

CACFP Infant Formula Offer Form

In order to claim infants on the Child and Adult Care Food Program, USDA requires all institutions/sites to offer at least one approved infant formula for participating infants under 1 year of age. A parent/guardian may decide not to use the offered infant formula and supply another approved infant formula. In order to claim an infant who is served a non-approved infant formula, there must be a note on file from a recognized medical authority.

Institution/Site Information

Name of institution/site: The Evergreen State College Campus Children's Center

Name of participating infant under 1 year of age: _____
