

Health and Safety Committee

December 1st, 2004 - Minutes:

In attendance:

- Nicole Allen
- Peter J. Pessiki
- Robyn Herring
- Joe Pollock
- Matt Lebens
- Beth Albertson
- Linda Pickering
- Mike Anchors

1. November minutes were approved.

2. November accident reports were reviewed, highlighting a spontaneous nose bleed in the swimming pool.

3. SMOKING:

- Money is now available for the long term smoking structures.
- Temporary structures, in the form of blue tents, have been placed around campus as an aid in drawing smokers away from the buildings. Is this working? Sounds like smoking near the library is still acting as a bit of a nuisance. Piles of cigarette butts are still appearing near Seminar II.

- A new structure will be going up on the red square side of Seminar II.

- It has been confirmed that 6 or 7 of these structures have been placed around campus.

4. POLICE SERVICES:

- Breath test records were called into question. Was the final result a .38% or a .038%? After comparing notes on personal experiences with alcohol, while also taking into account that on 11/08/04 Officer Neely restated in an email that the breath result was .038%, the committee decided that it would be necessary to see if there might be some sort of computer record available that would further clarify the official result of the breath test. Linda is looking into this.

- The student in question submitted a hand written retraction of the statement that had initially implied that Peter was connected to this event.

5. Meeting adjourned.
