

# CLIMATE CHANGE CAP AND TAX POLICIES

---

Kristin Eberhard, Sightline Institute

January 13, 2016

We are already paying the price for global warming pollution.

# Disappearing snowpacks

# Worsening wildfires

# The West Coast already has climate pollution reduction goals in place.

Right now, polluters can dump for free.

You don't get a free lunch for your trash.

\$

Free

# Let's stop the free lunch for pollution.

\$

Free

Large polluters pay for every ton of global warming pollution.

= \$

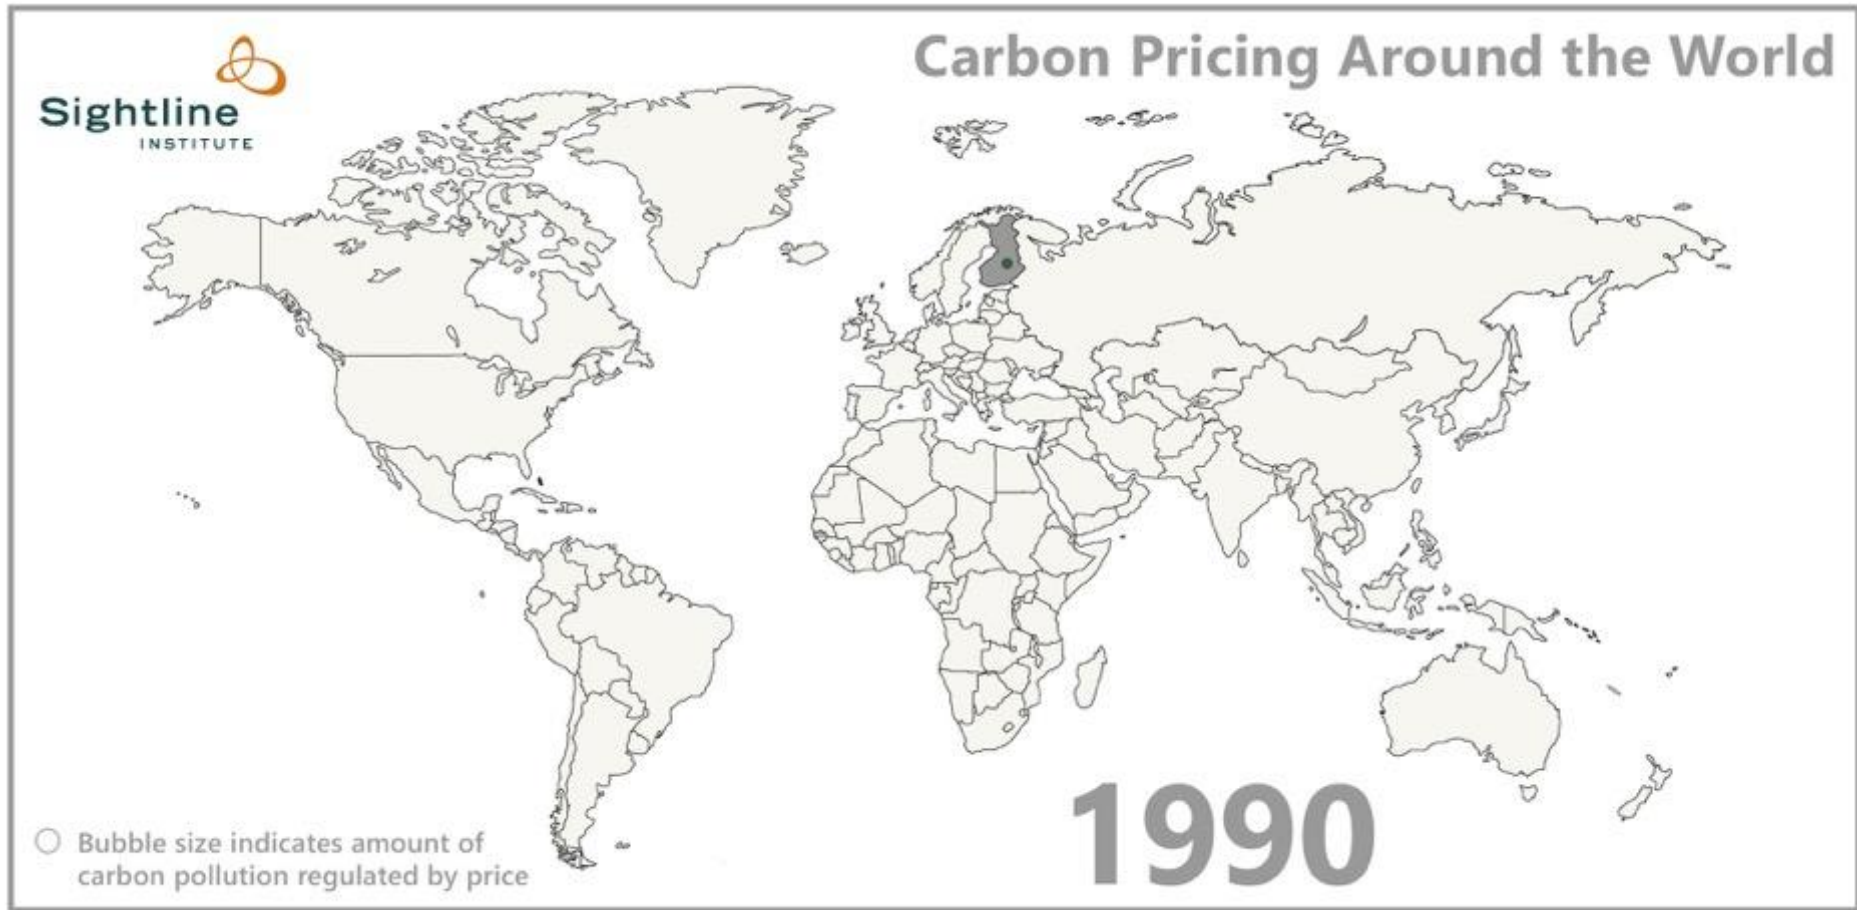

# Make polluters pay for carbon pollution... is this idea new and untested?

Sure. . . .

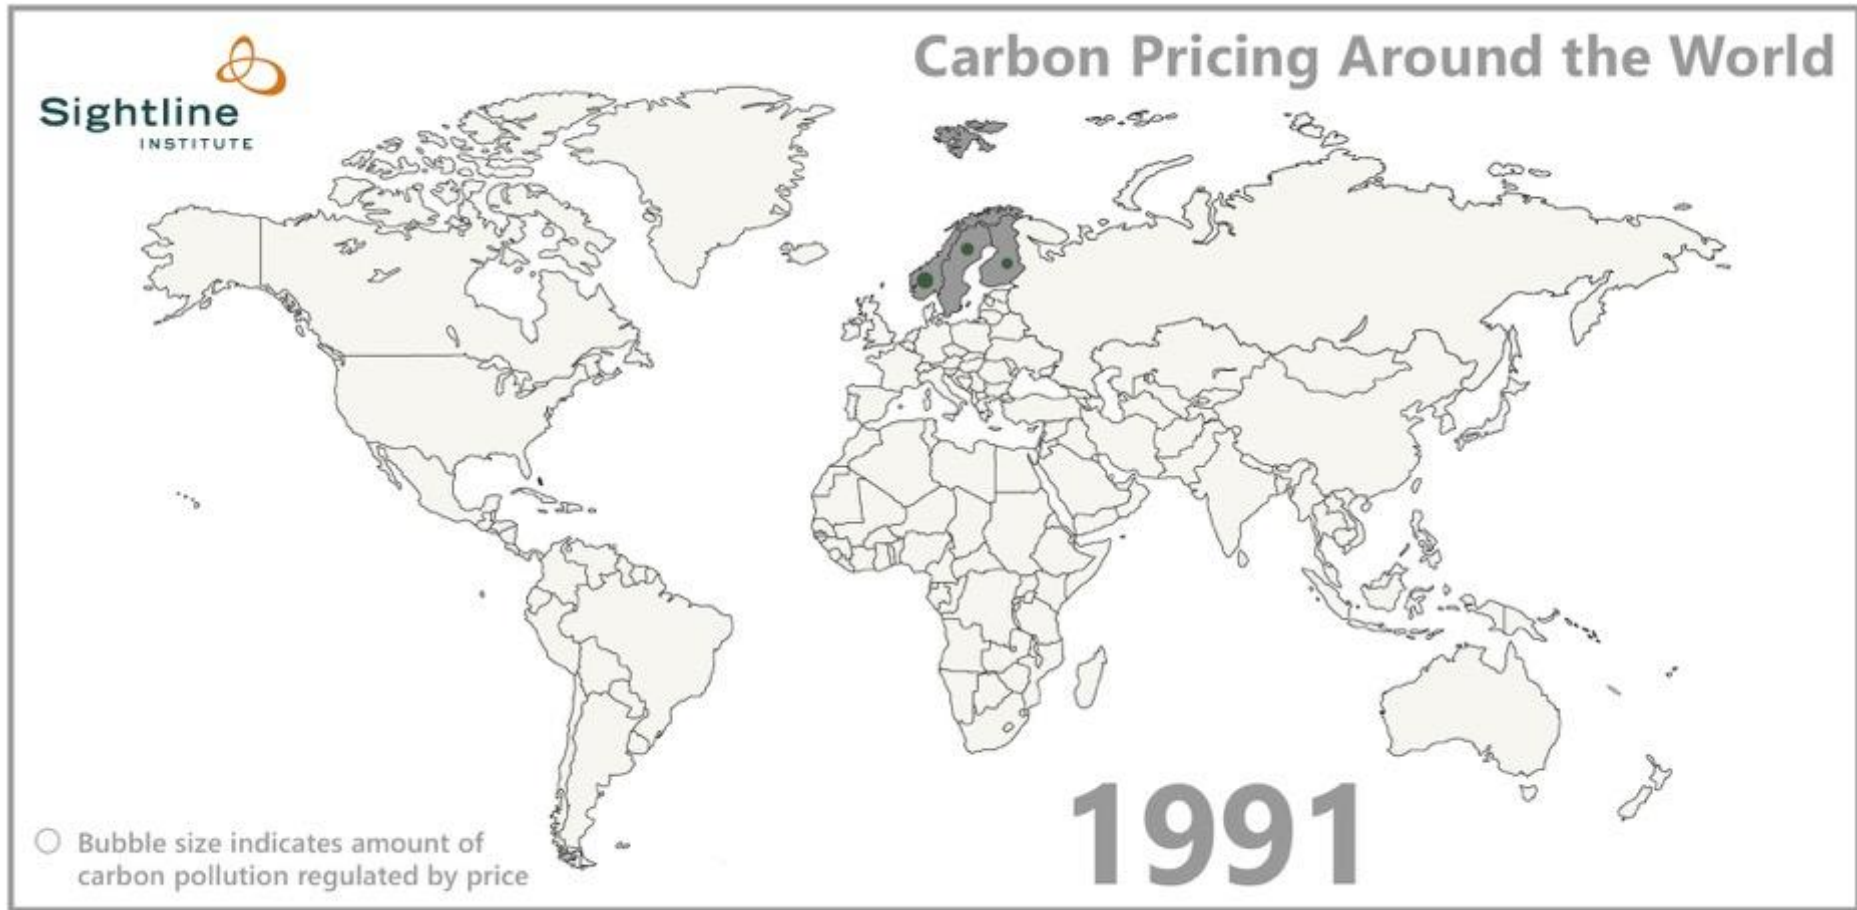

if this is 1990

and we are in Finland.

# We are not alone.

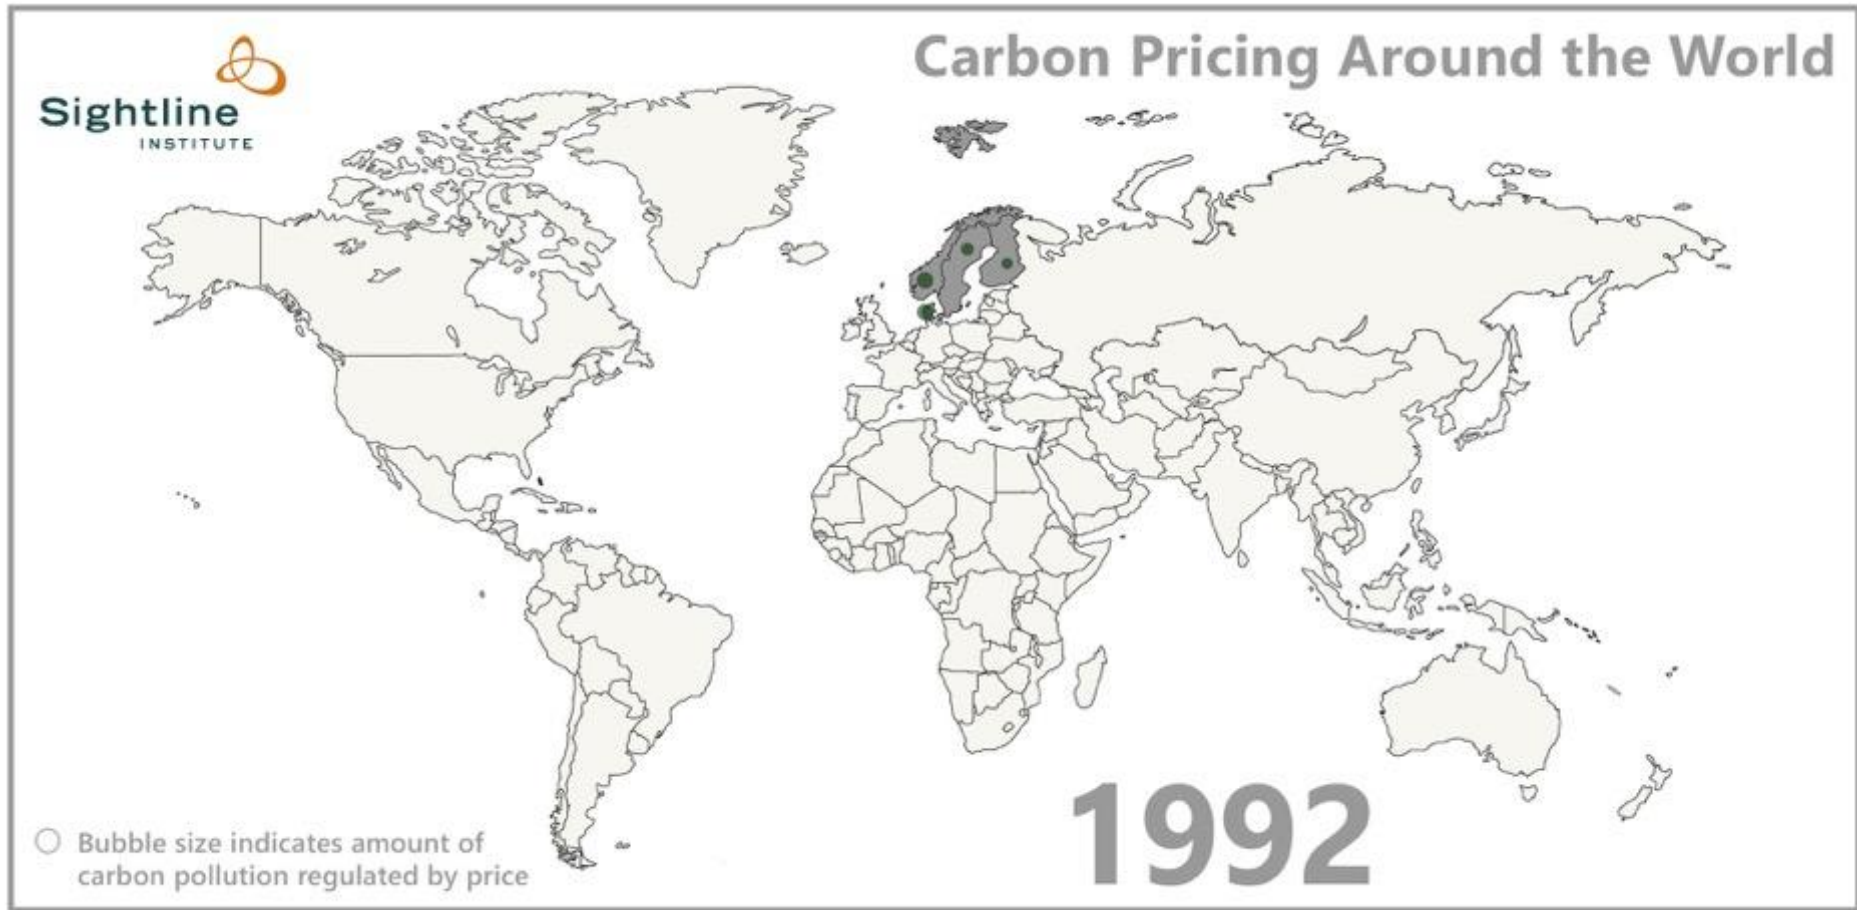

# We are not alone.

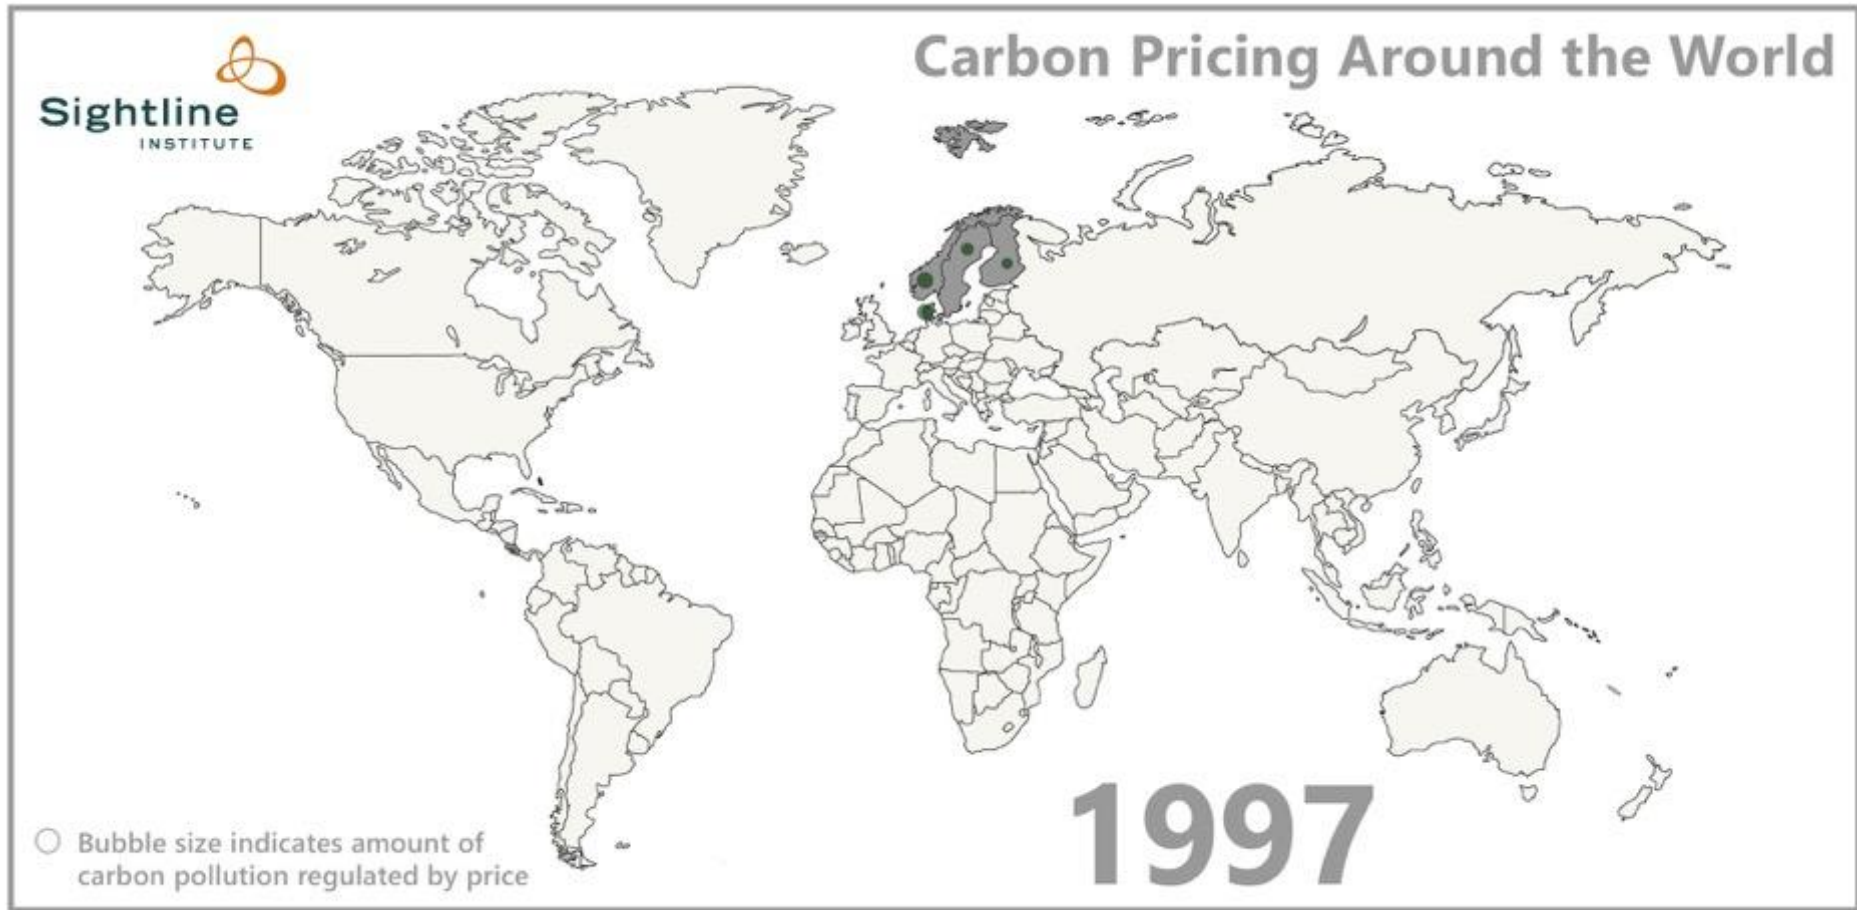

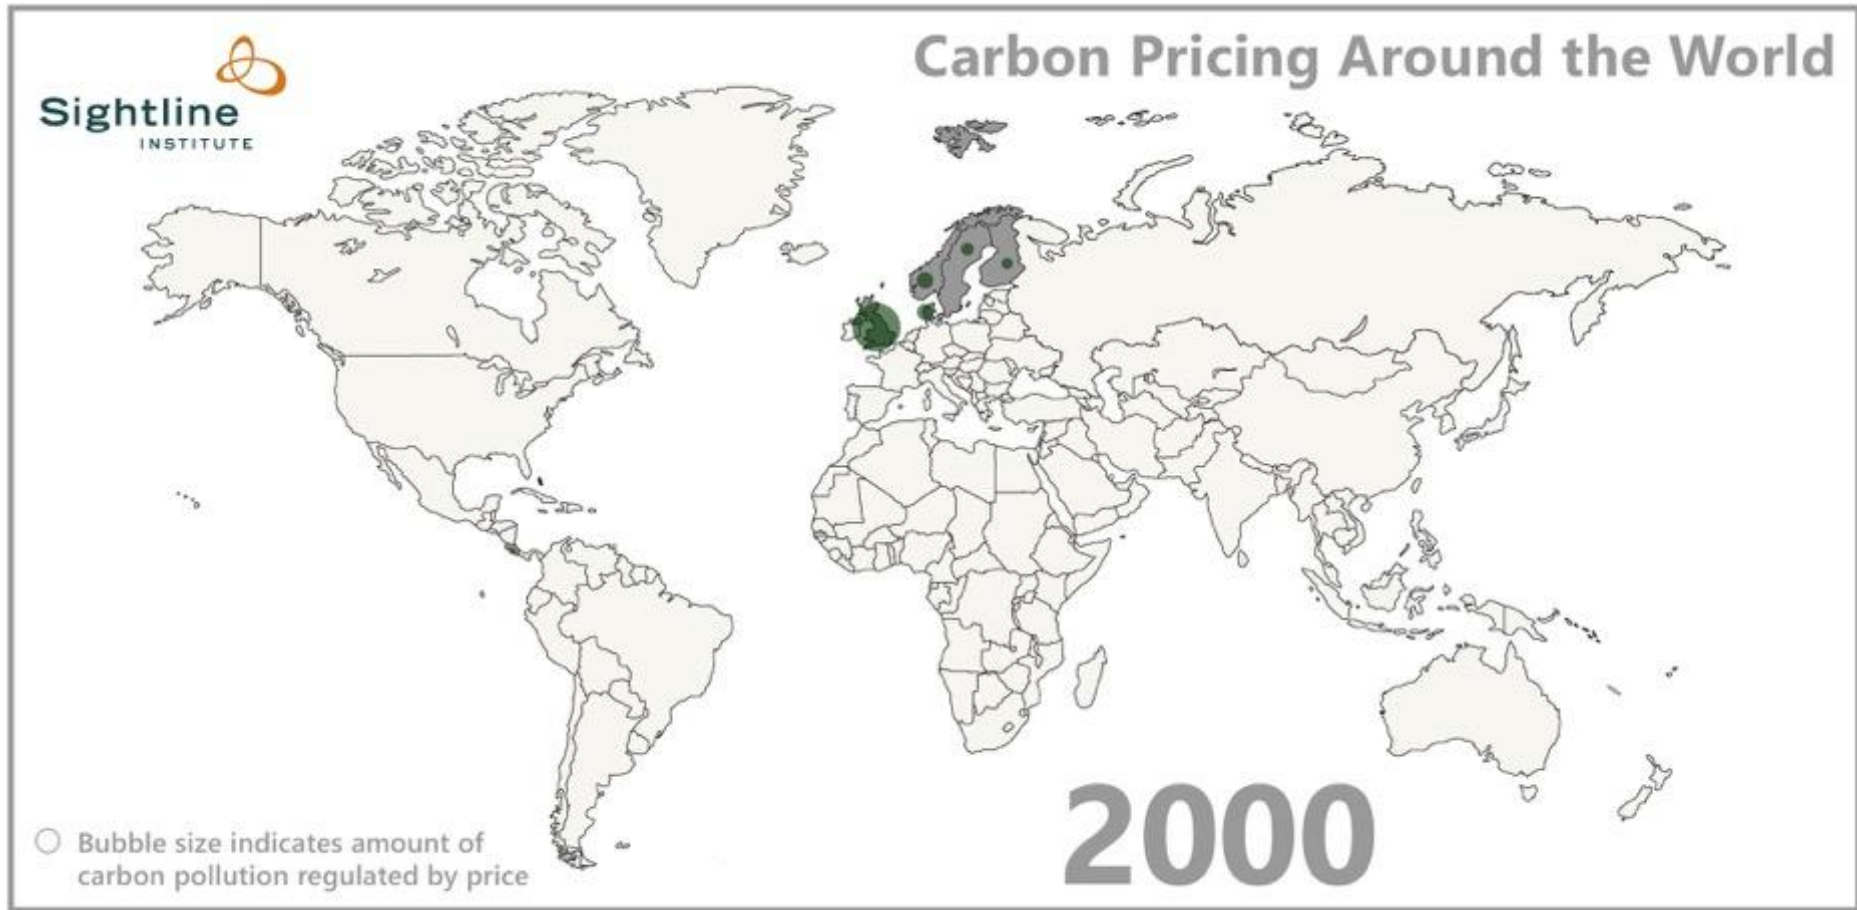

# We are not alone.

# We are not alone.

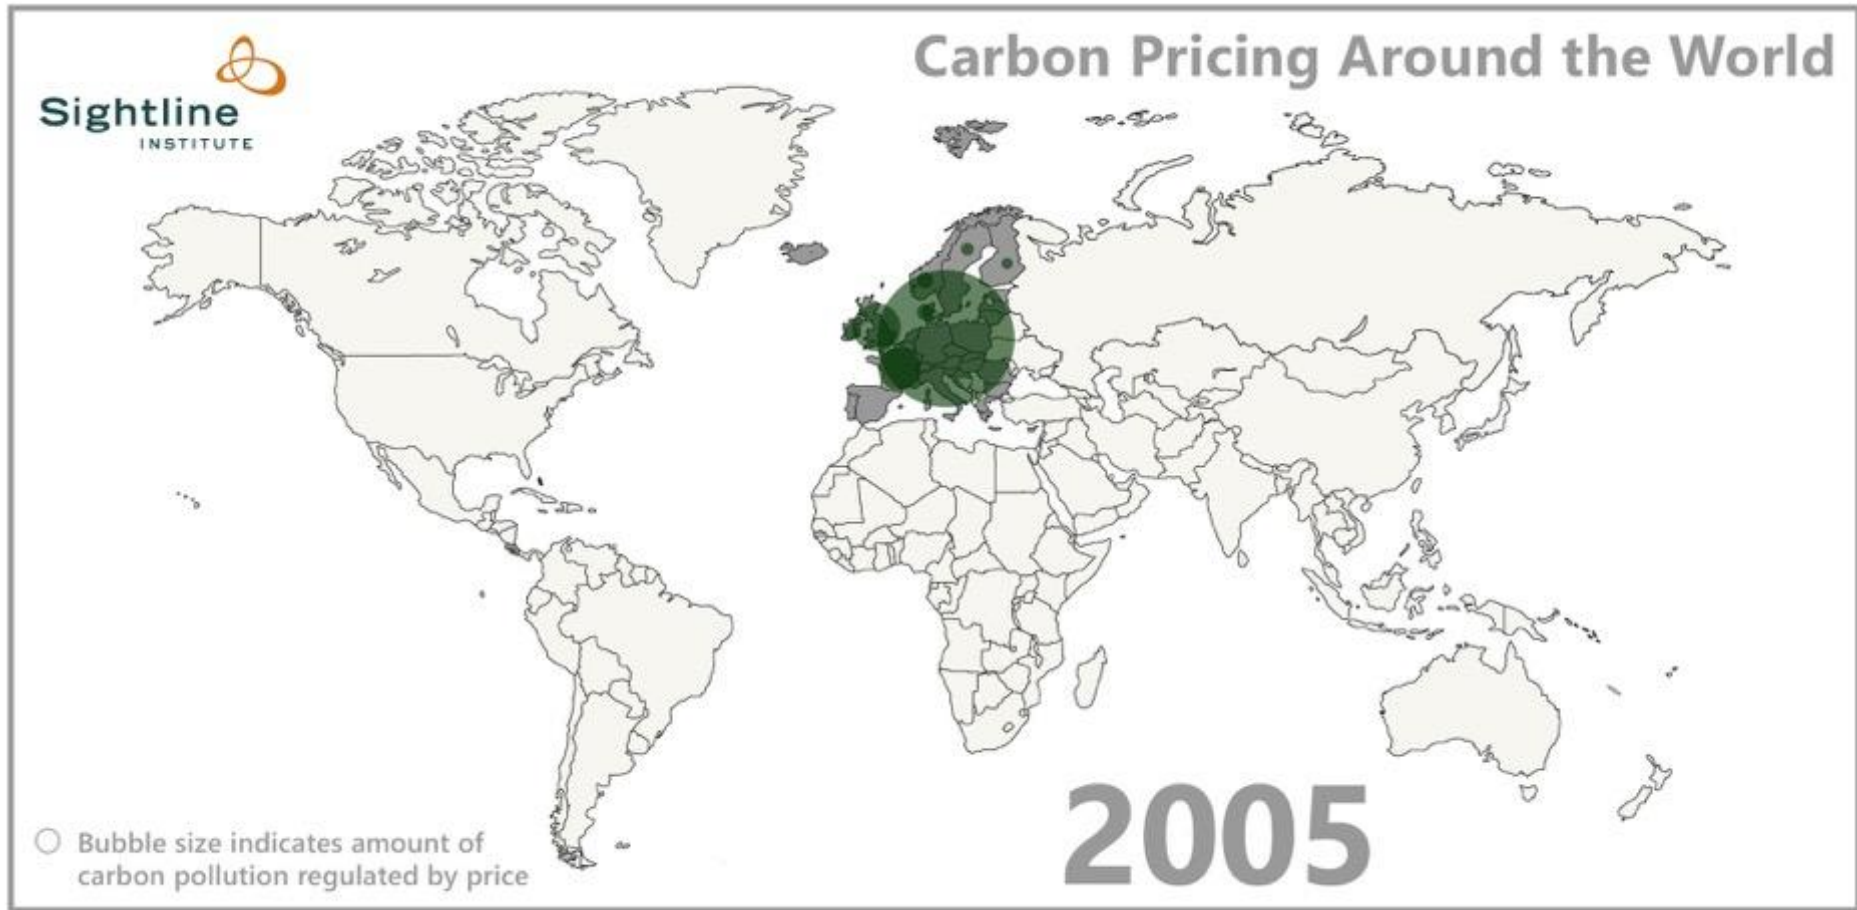

# We are not alone.

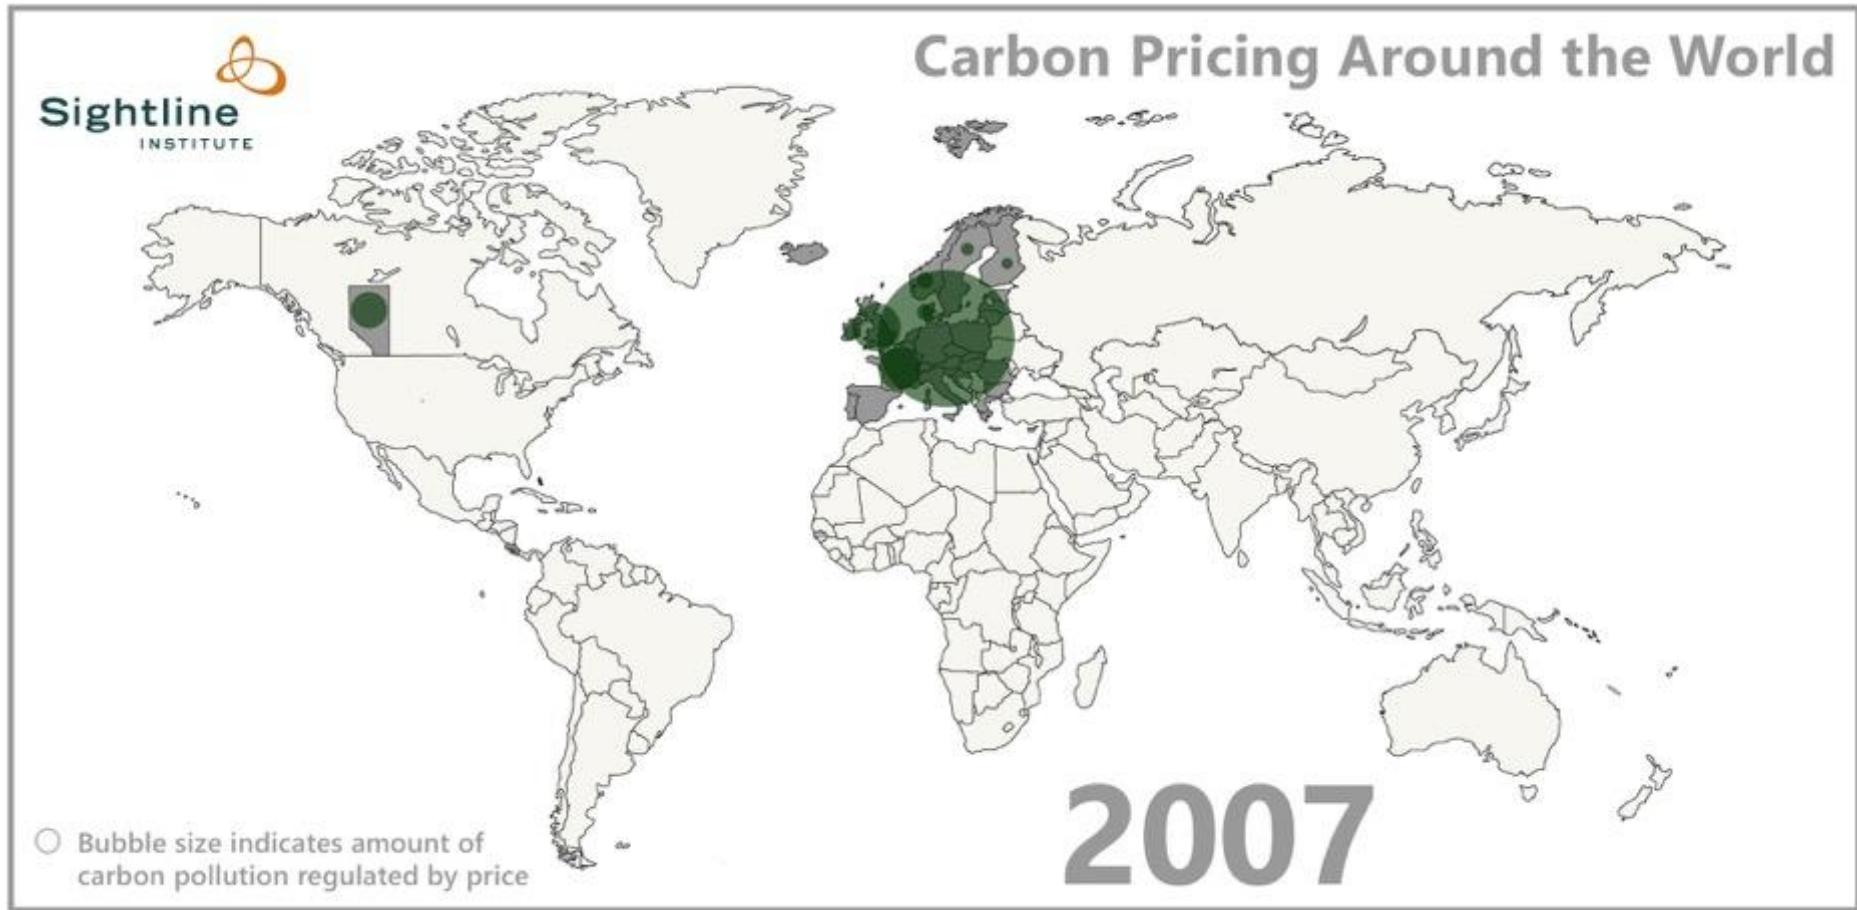

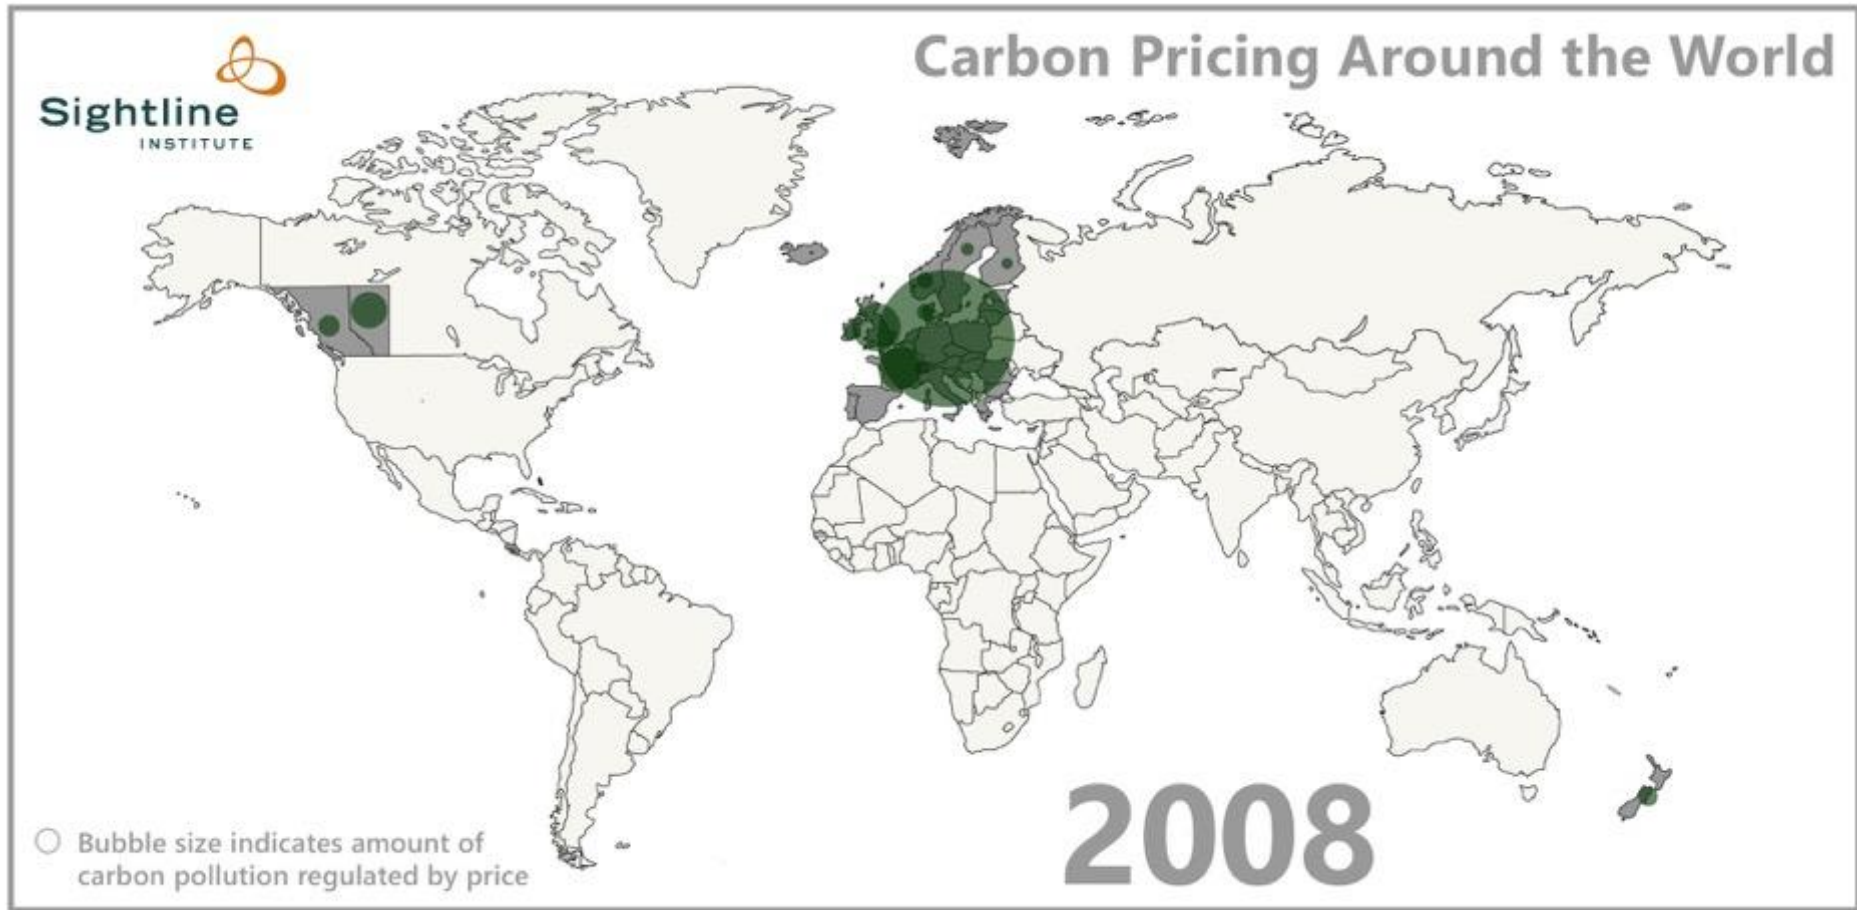

# We are not alone.

# We are not alone.

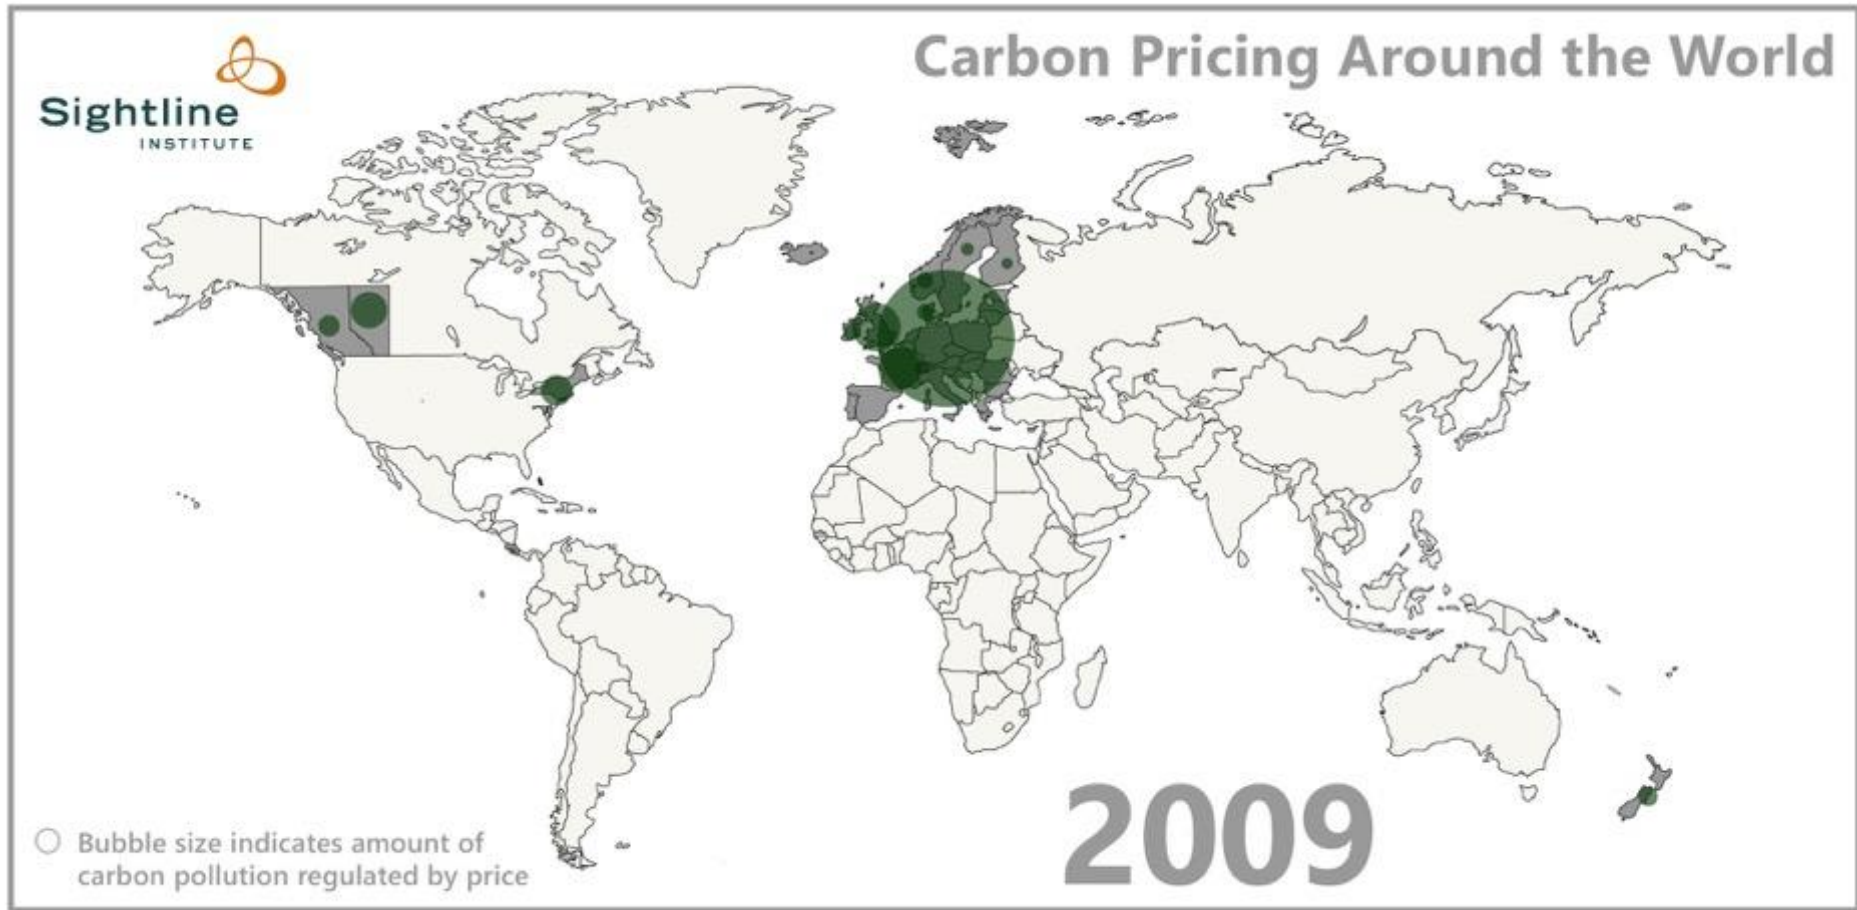

# We are not alone.

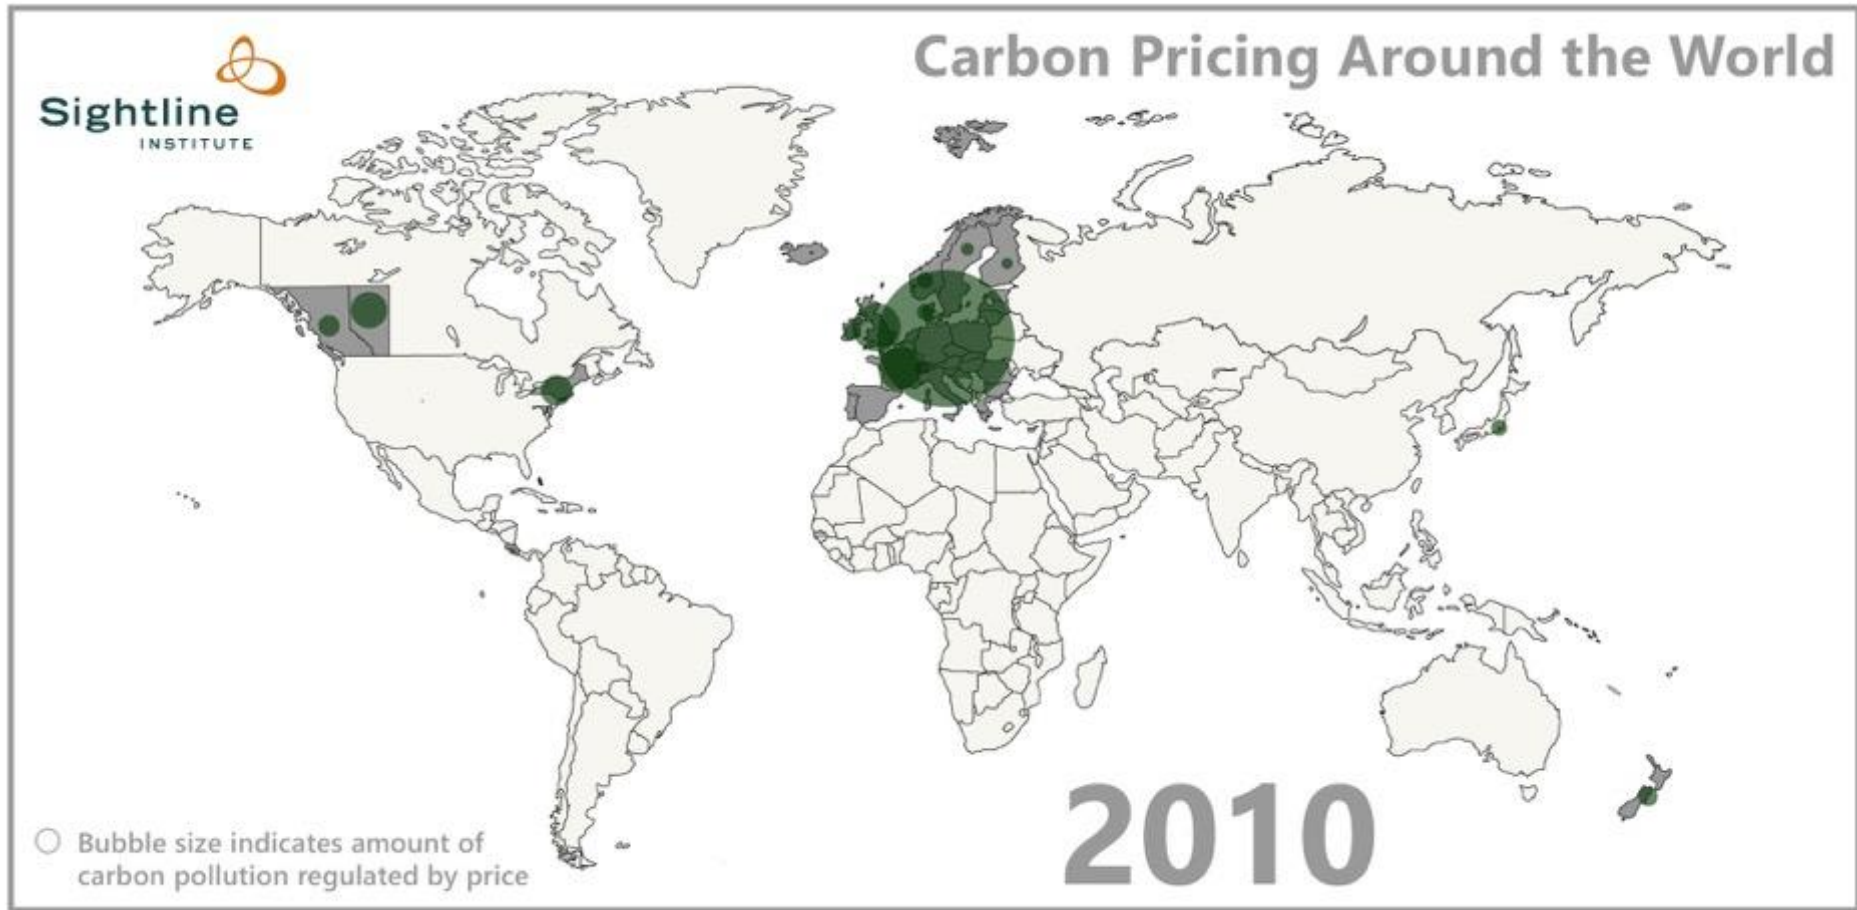

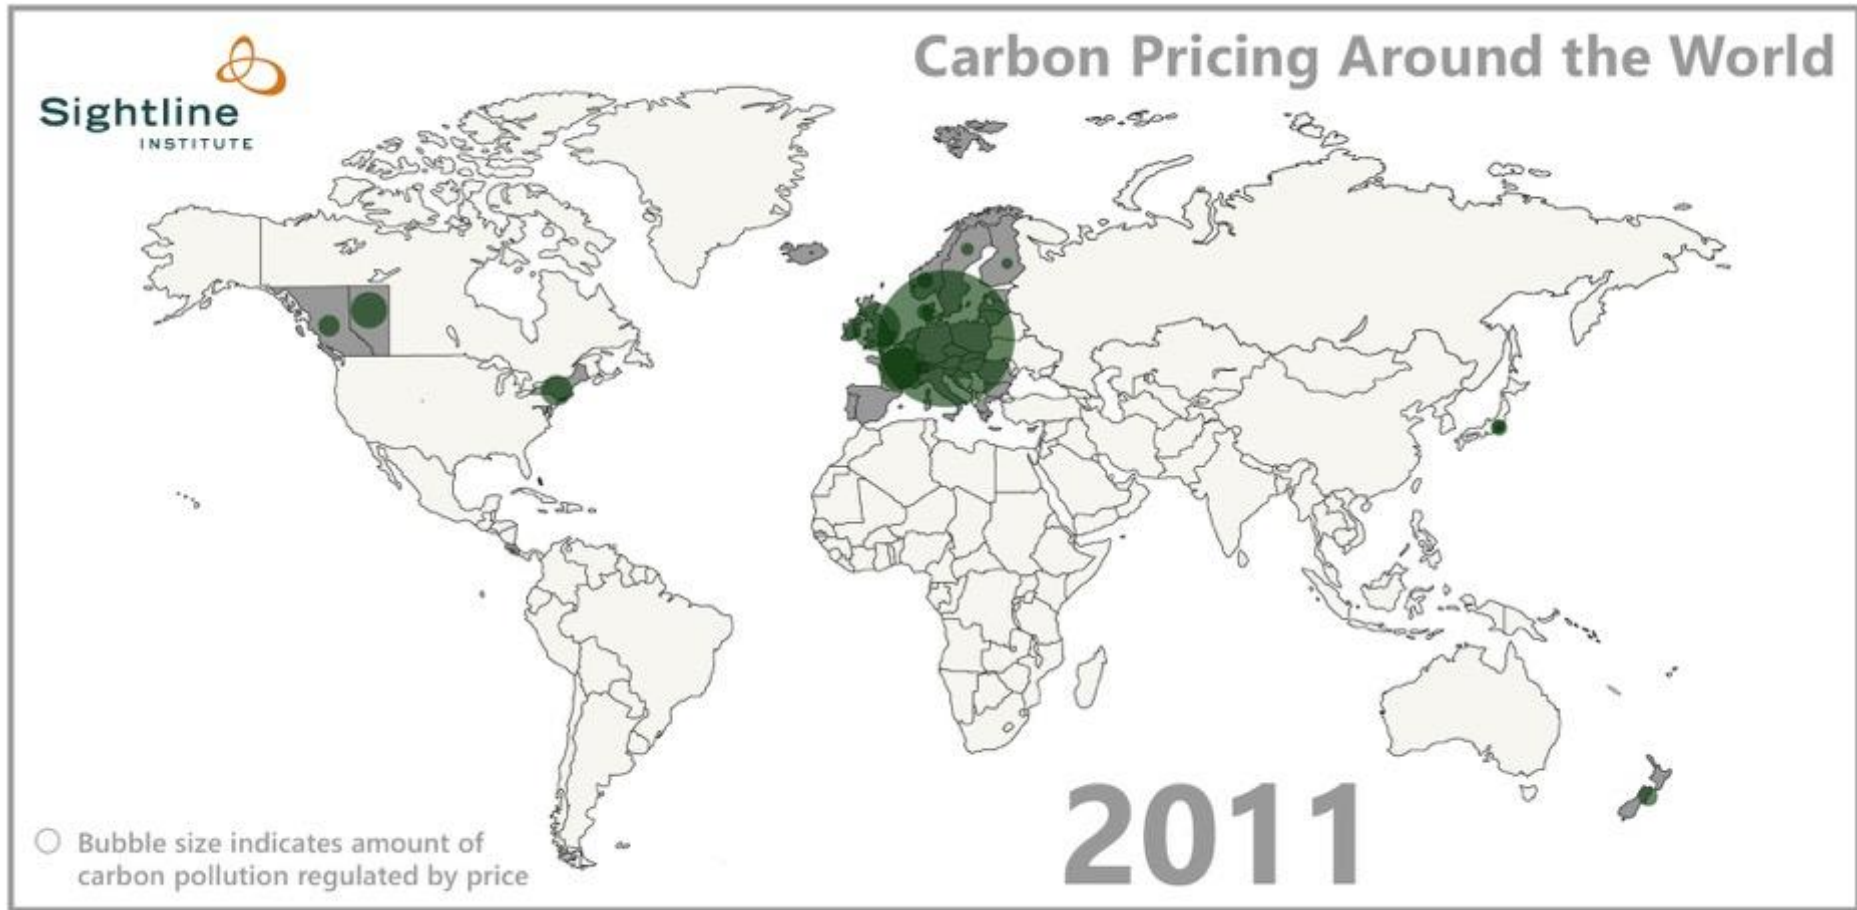

# We are not alone.

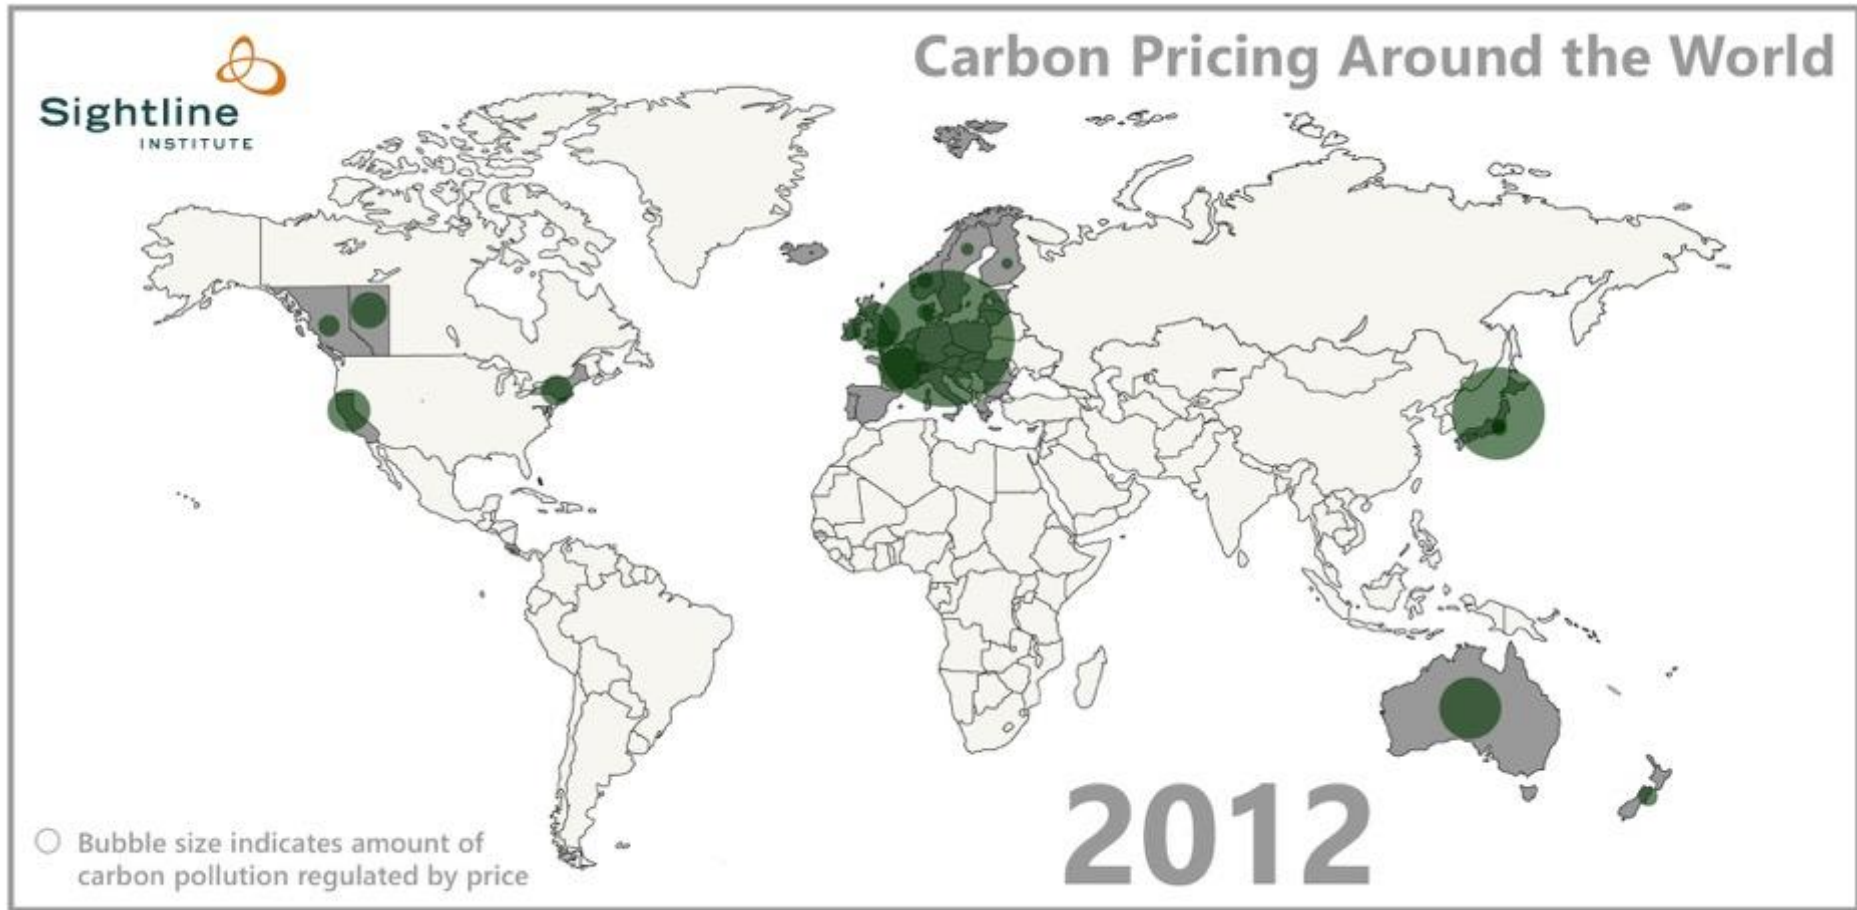

# We are not alone.

# We are not alone.

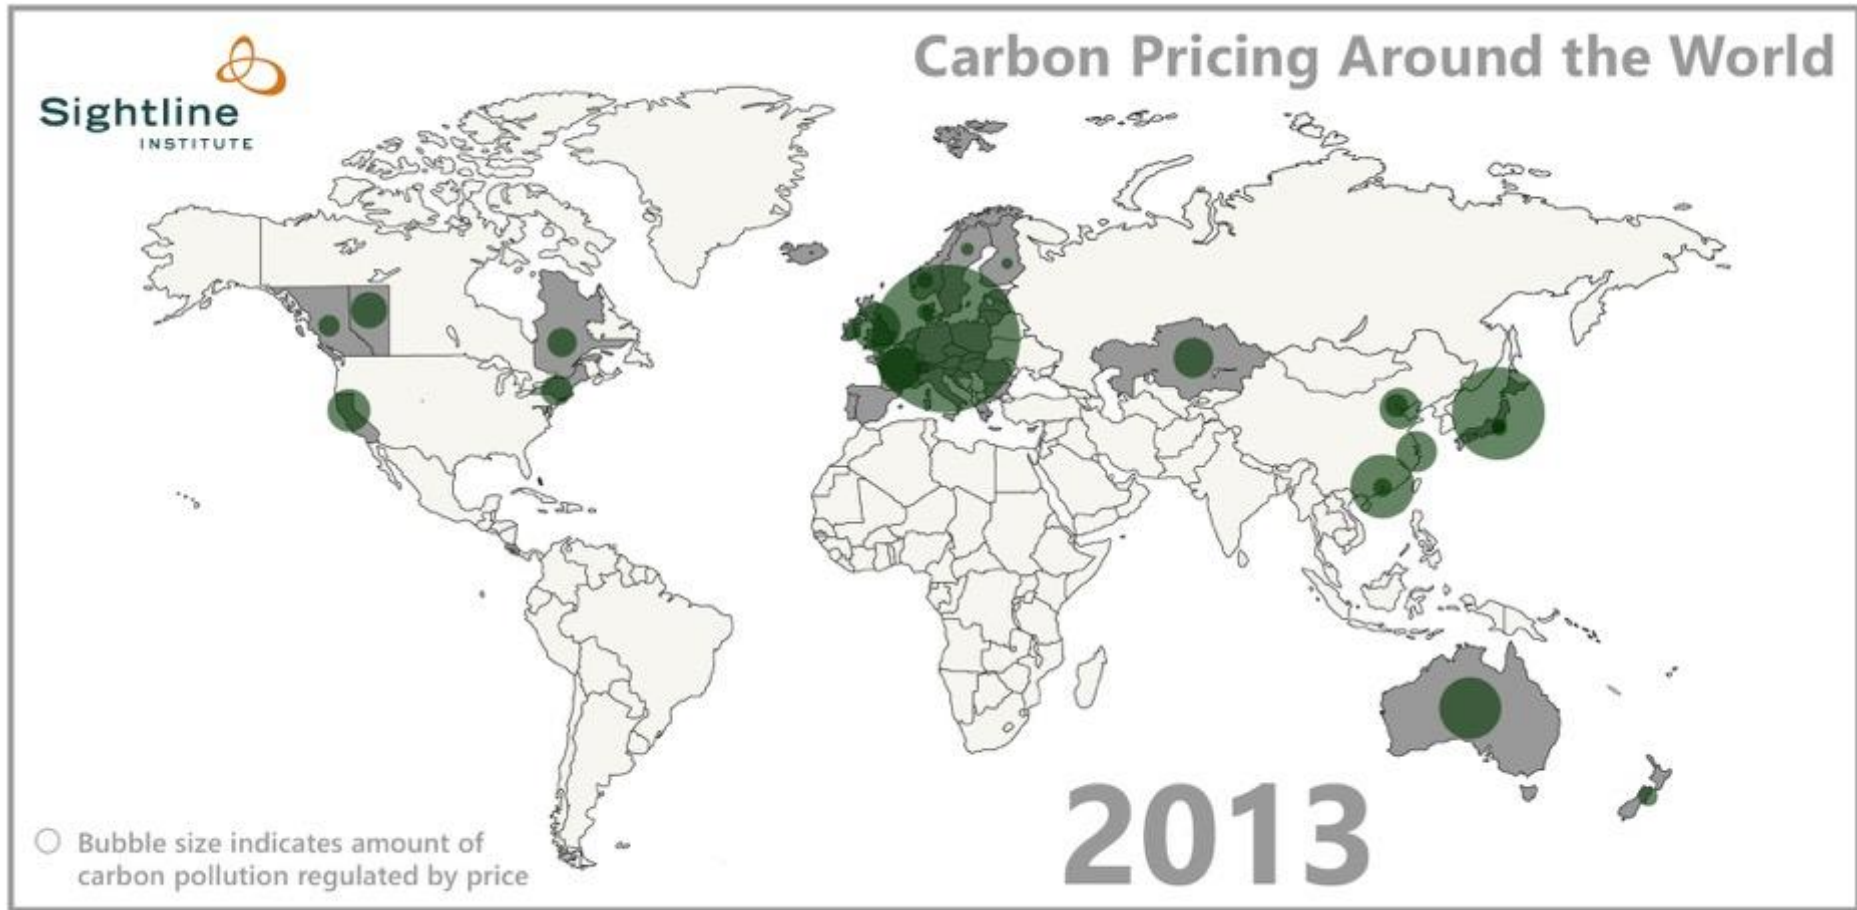

# We are not alone.

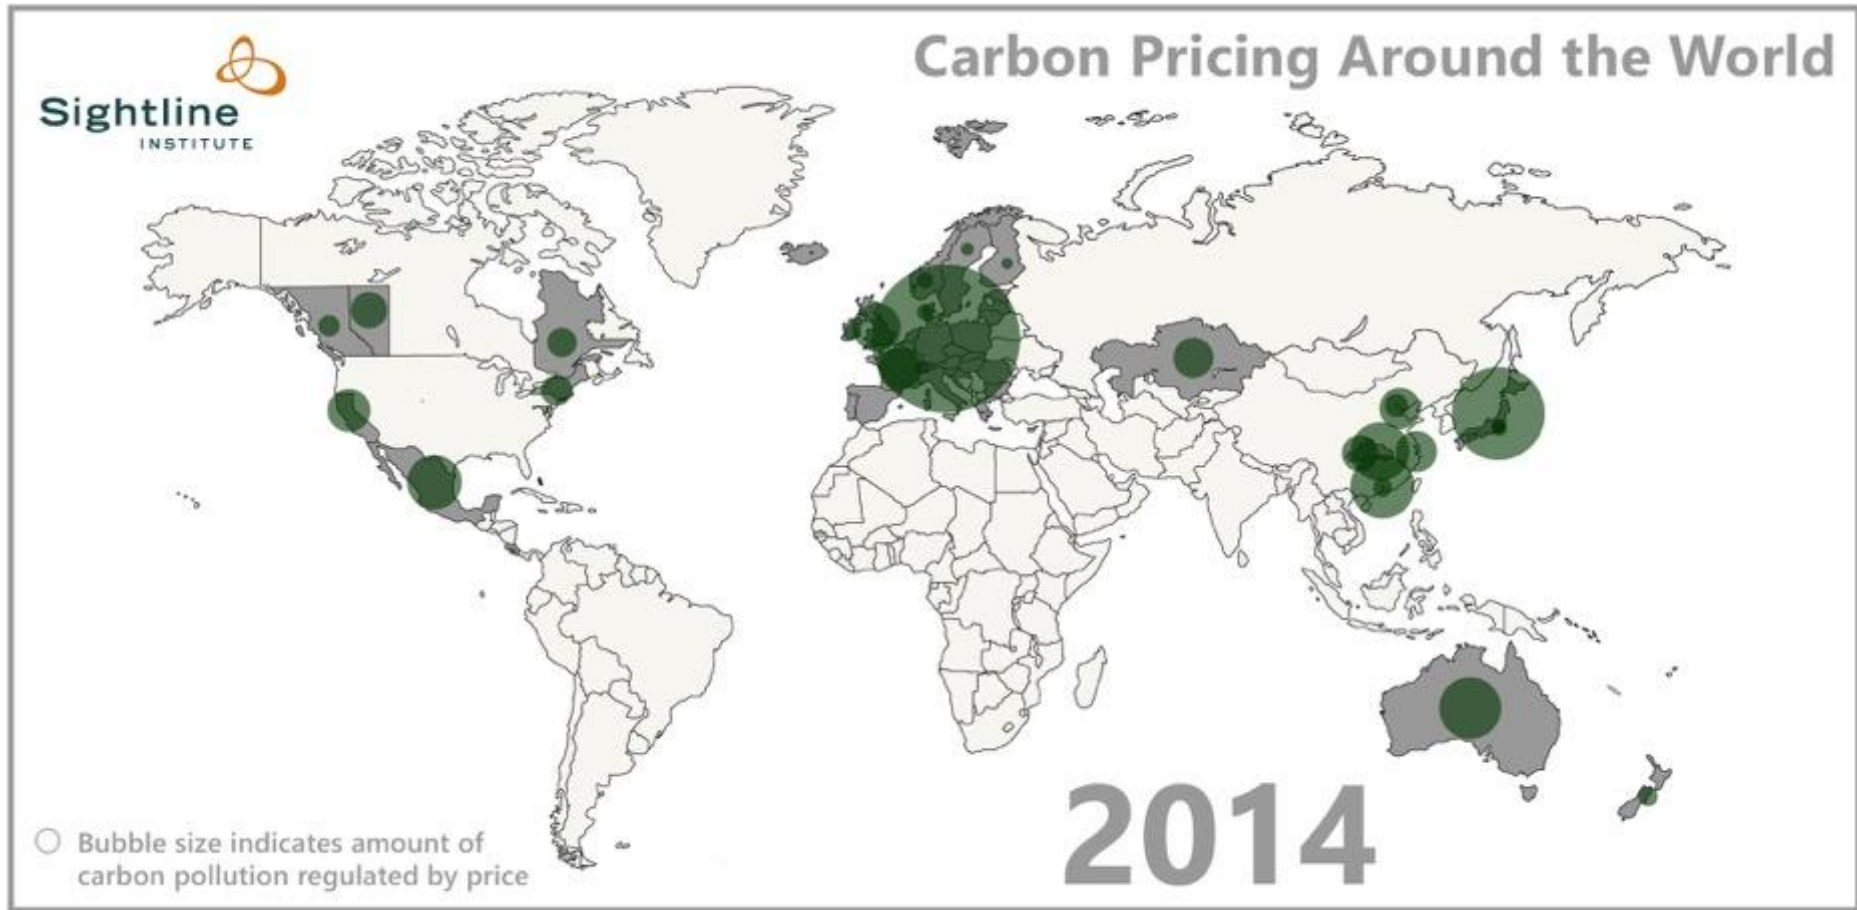

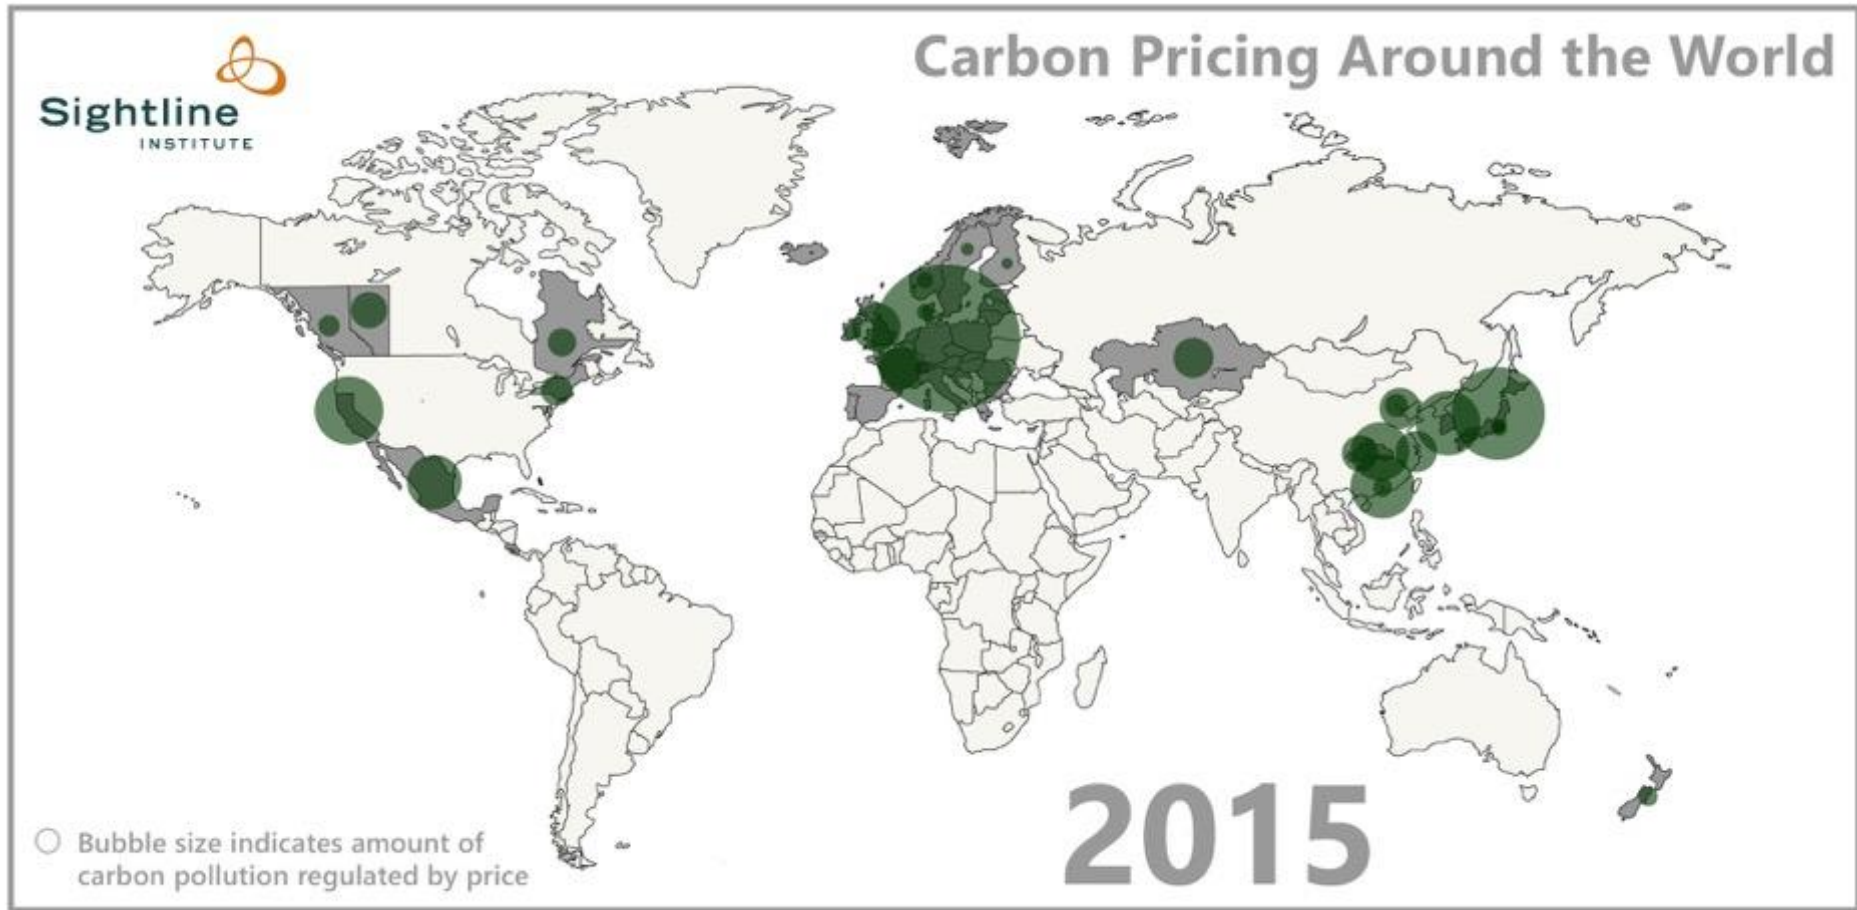

# We are not alone.

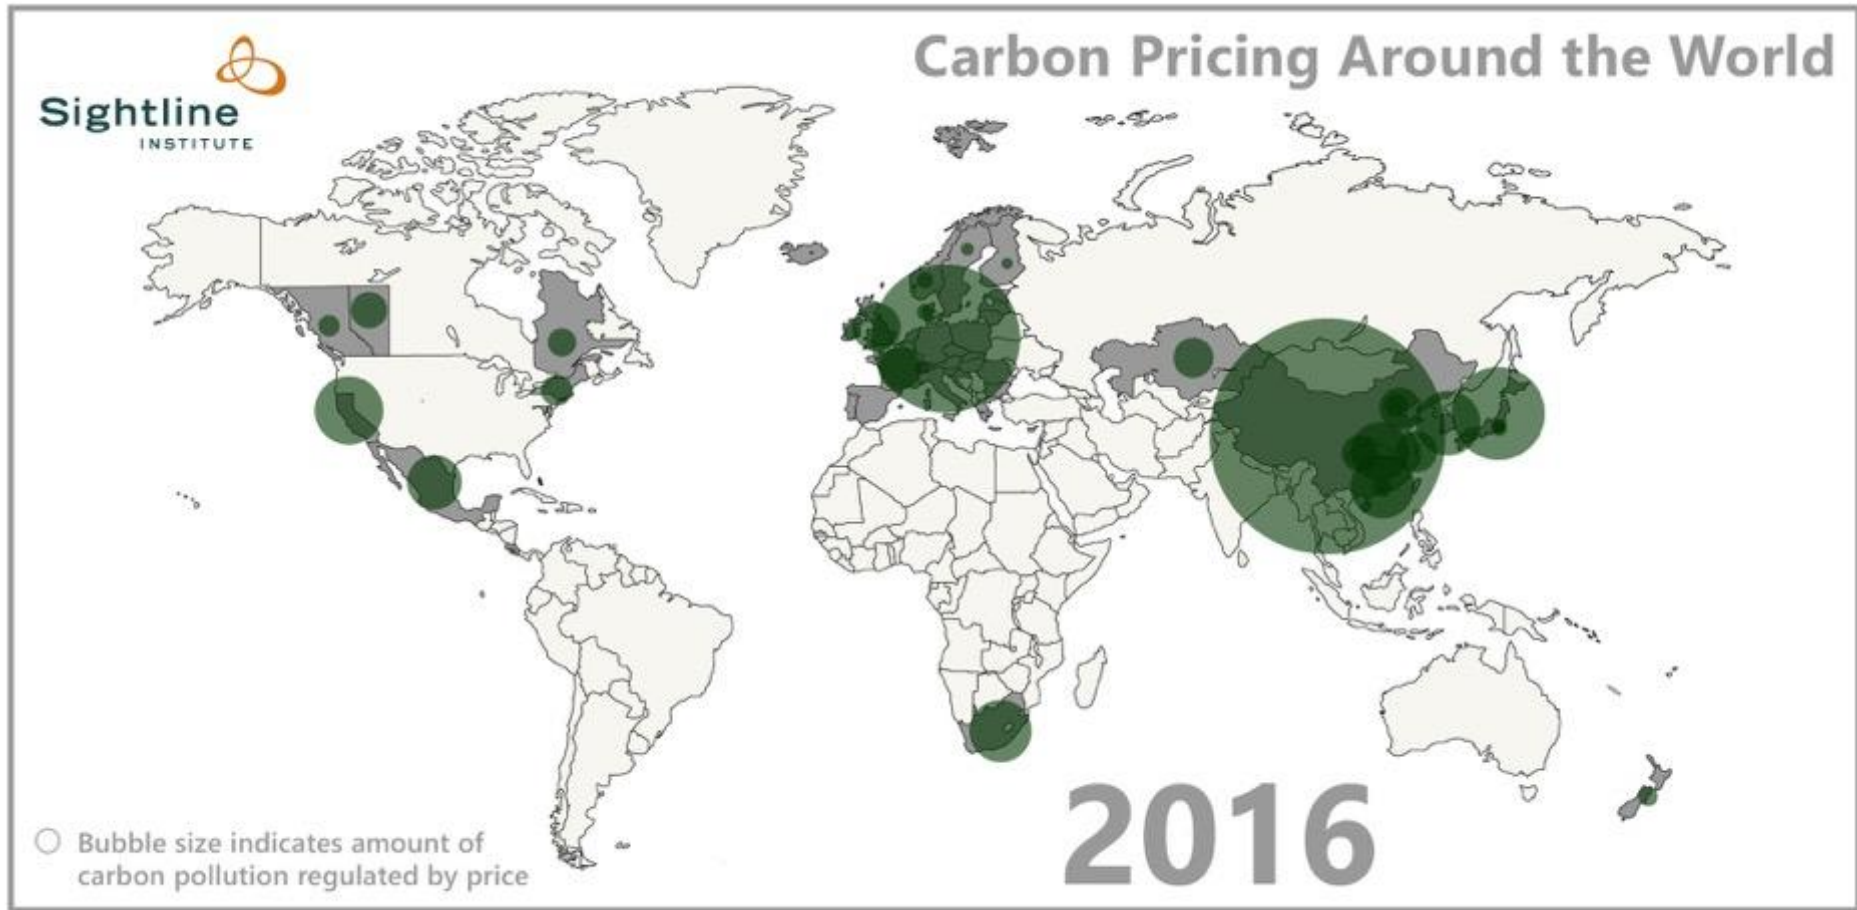

# We are not alone.

# We are not alone.

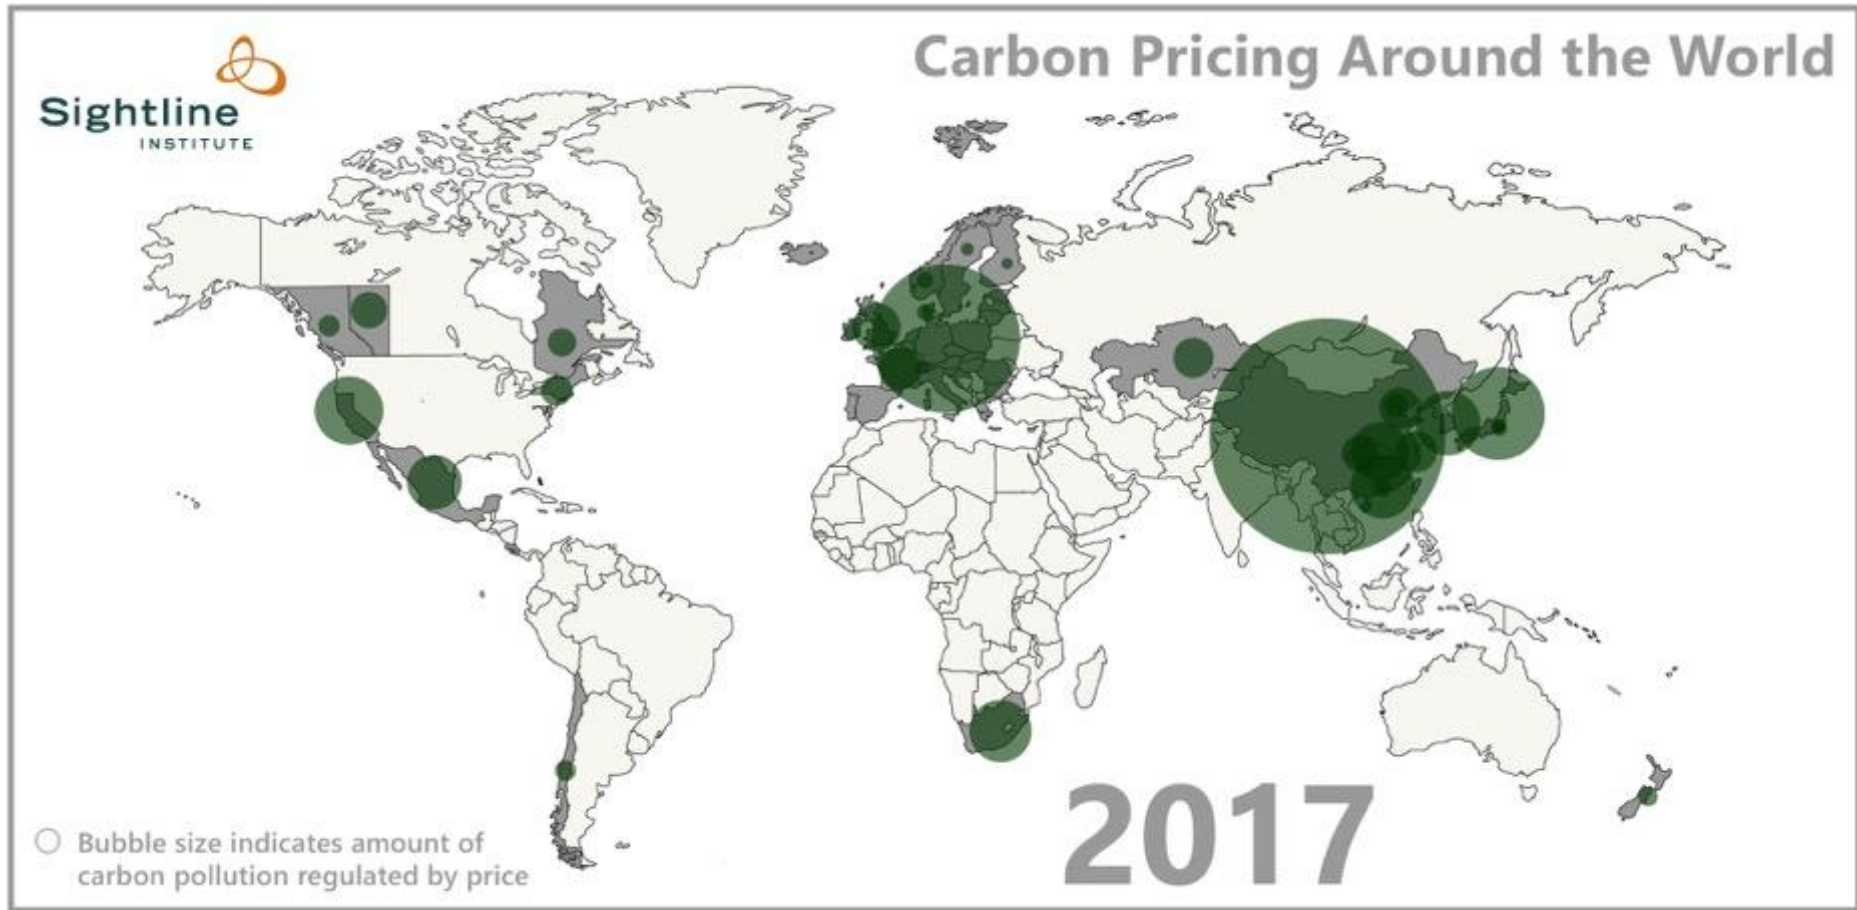

# We are not alone.

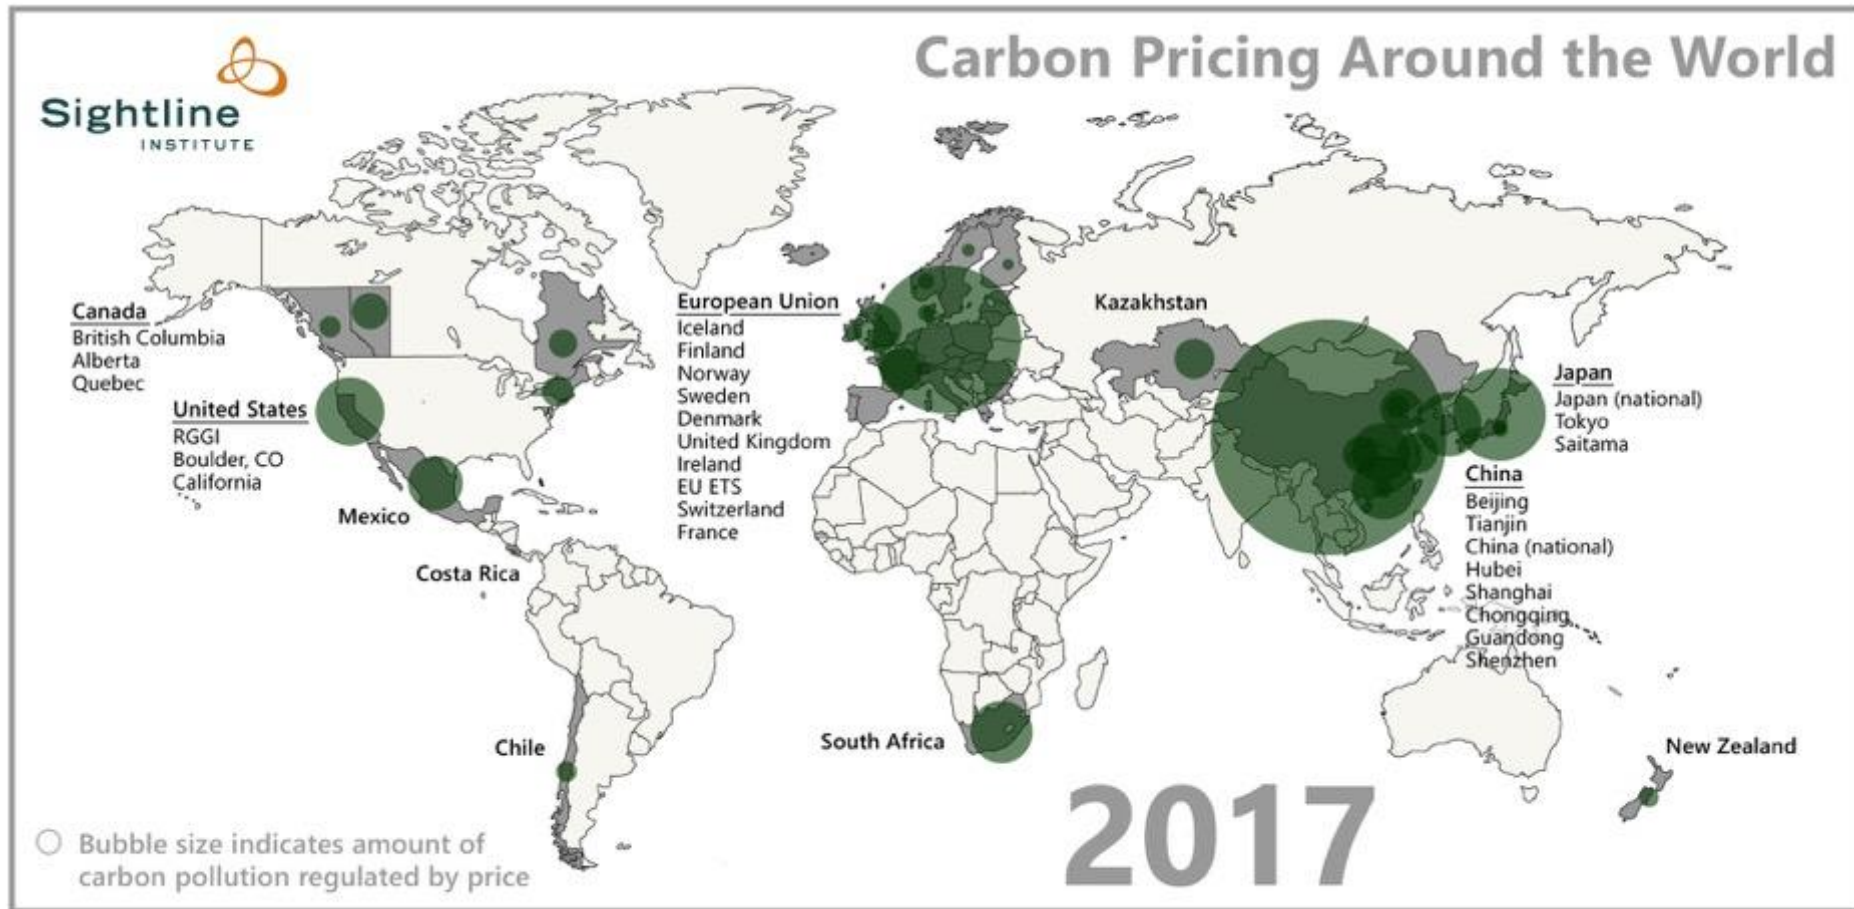

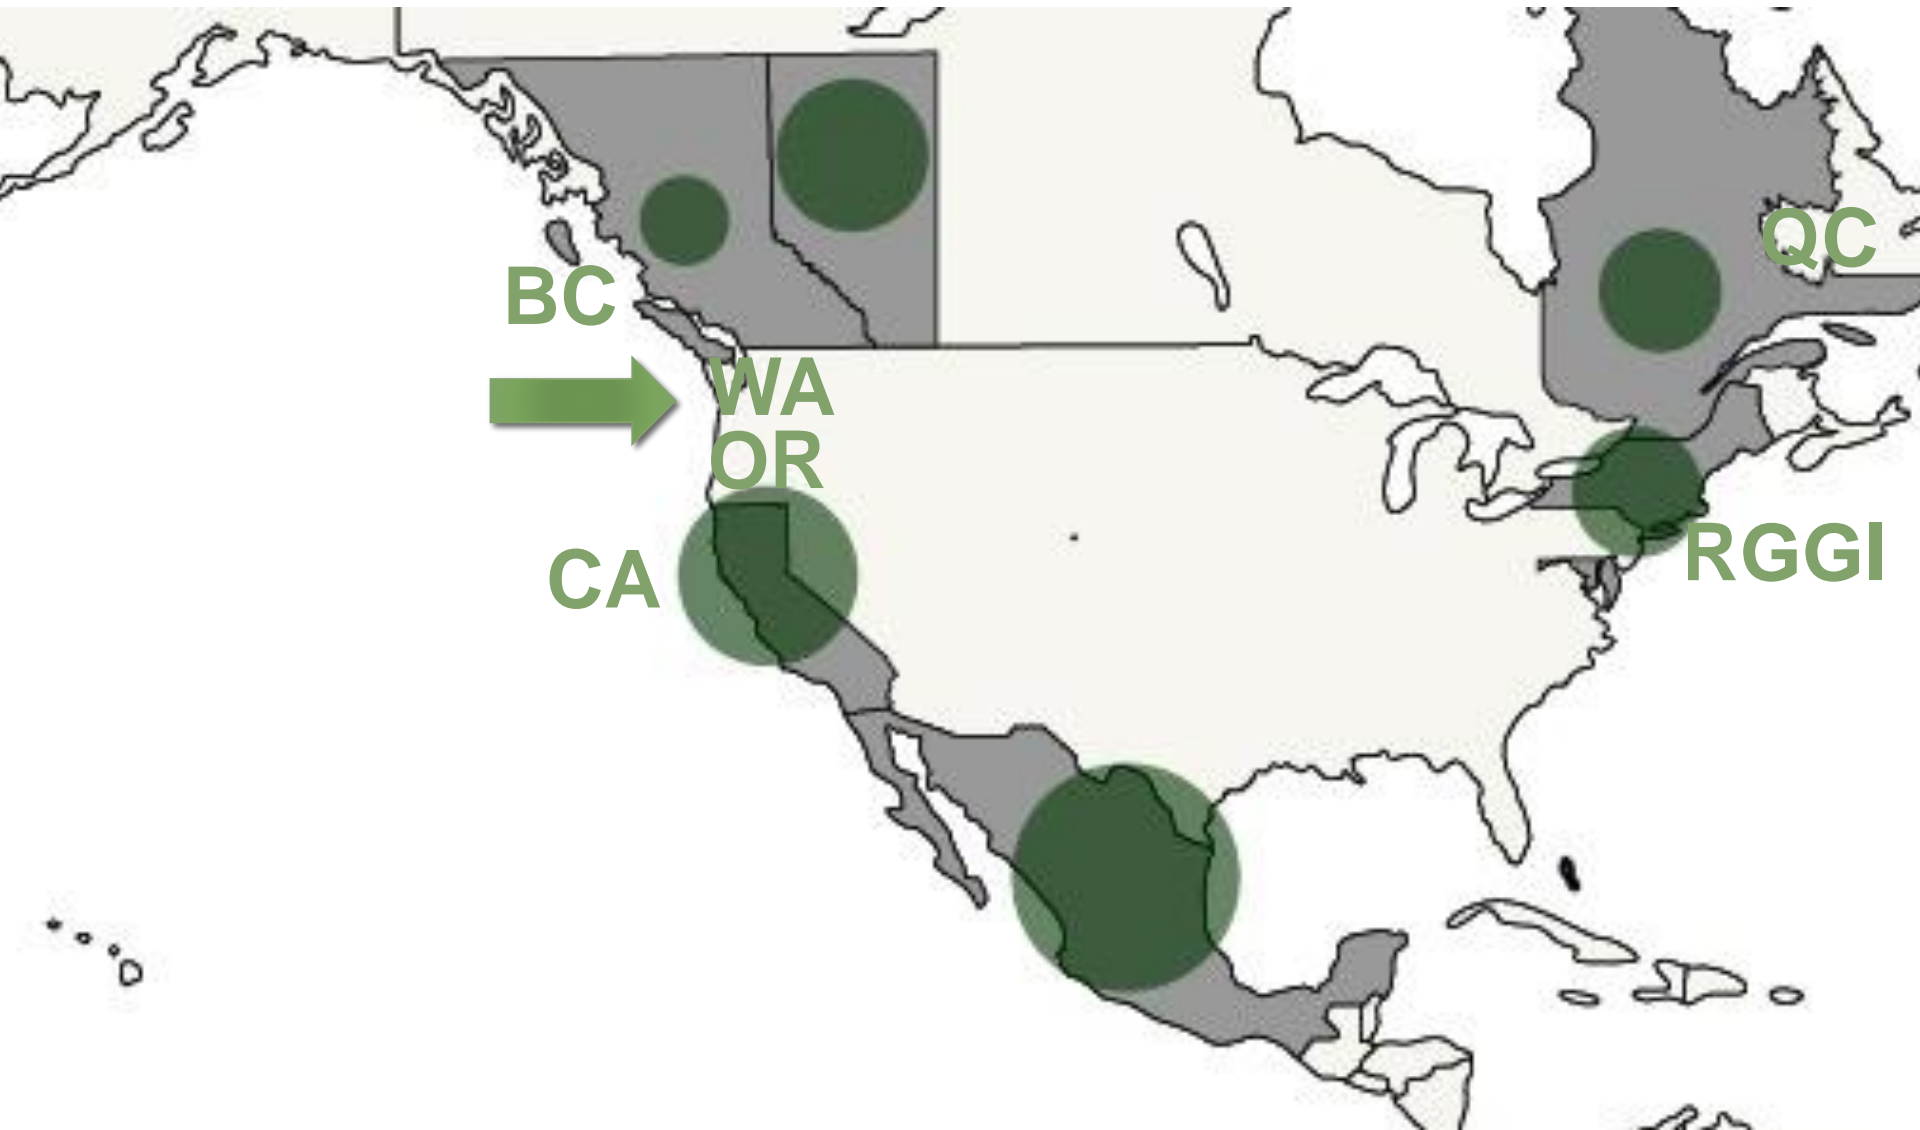

# We are not alone.

By 2017, almost ¼ of all carbon pollution in the world will have a price tag attached.

Oregon and Washington are in position to form a West Coast block.

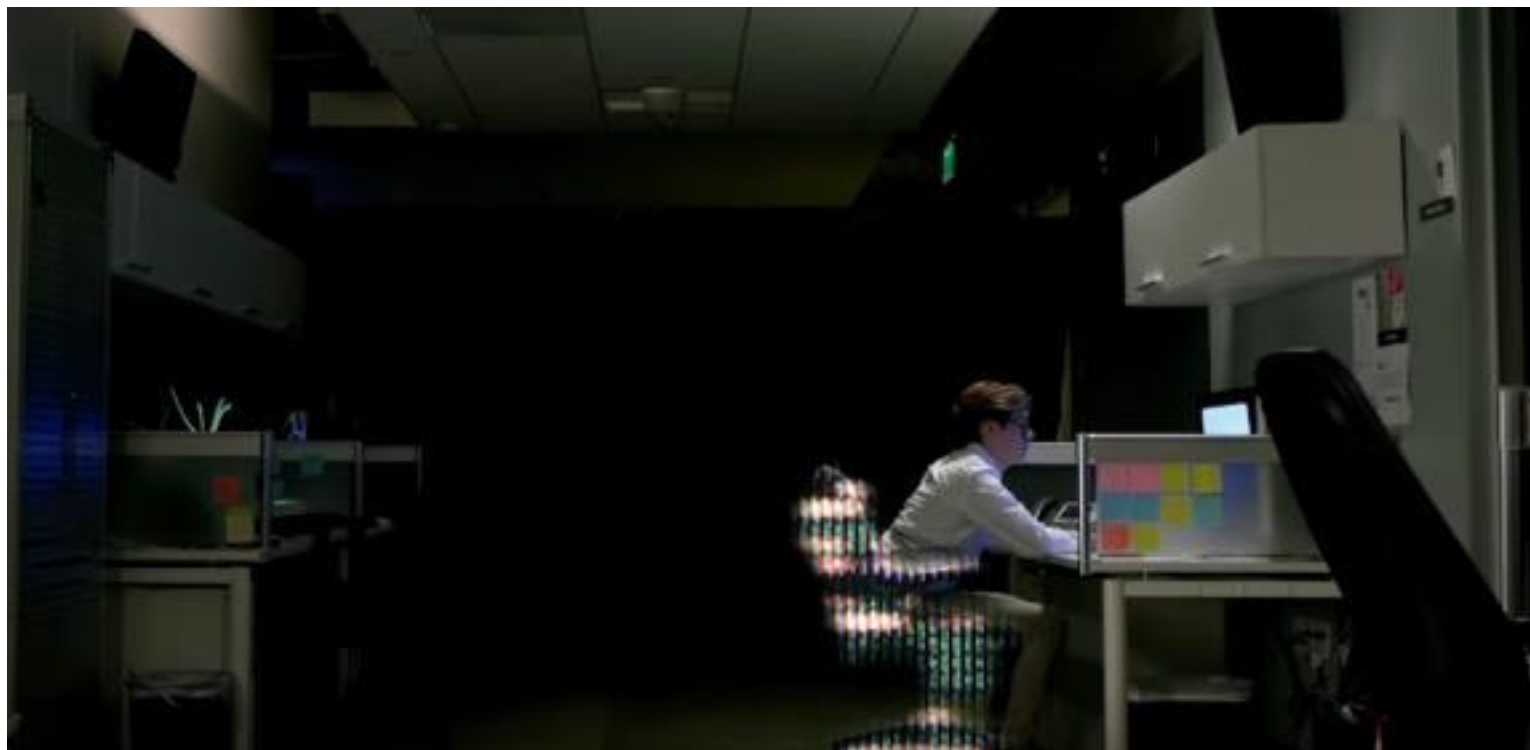

# Clean energy!

# Will we have to give up our modern life?

# Number of Planets Needed

If everyone lived like a resident of the following countries, we would need:

Balanced Budget

Deficit Spending

USA  
4.16

Russia  
2.73

Brazil  
1.95

China  
1.18

India  
0.49

World Avg  
1.56 Earths

\*Overshoot Day: The day of the year when our Ecological Footprint exceeds the Earth's bio-capacity. From Overshoot Day forward we are overdrawing from our future.

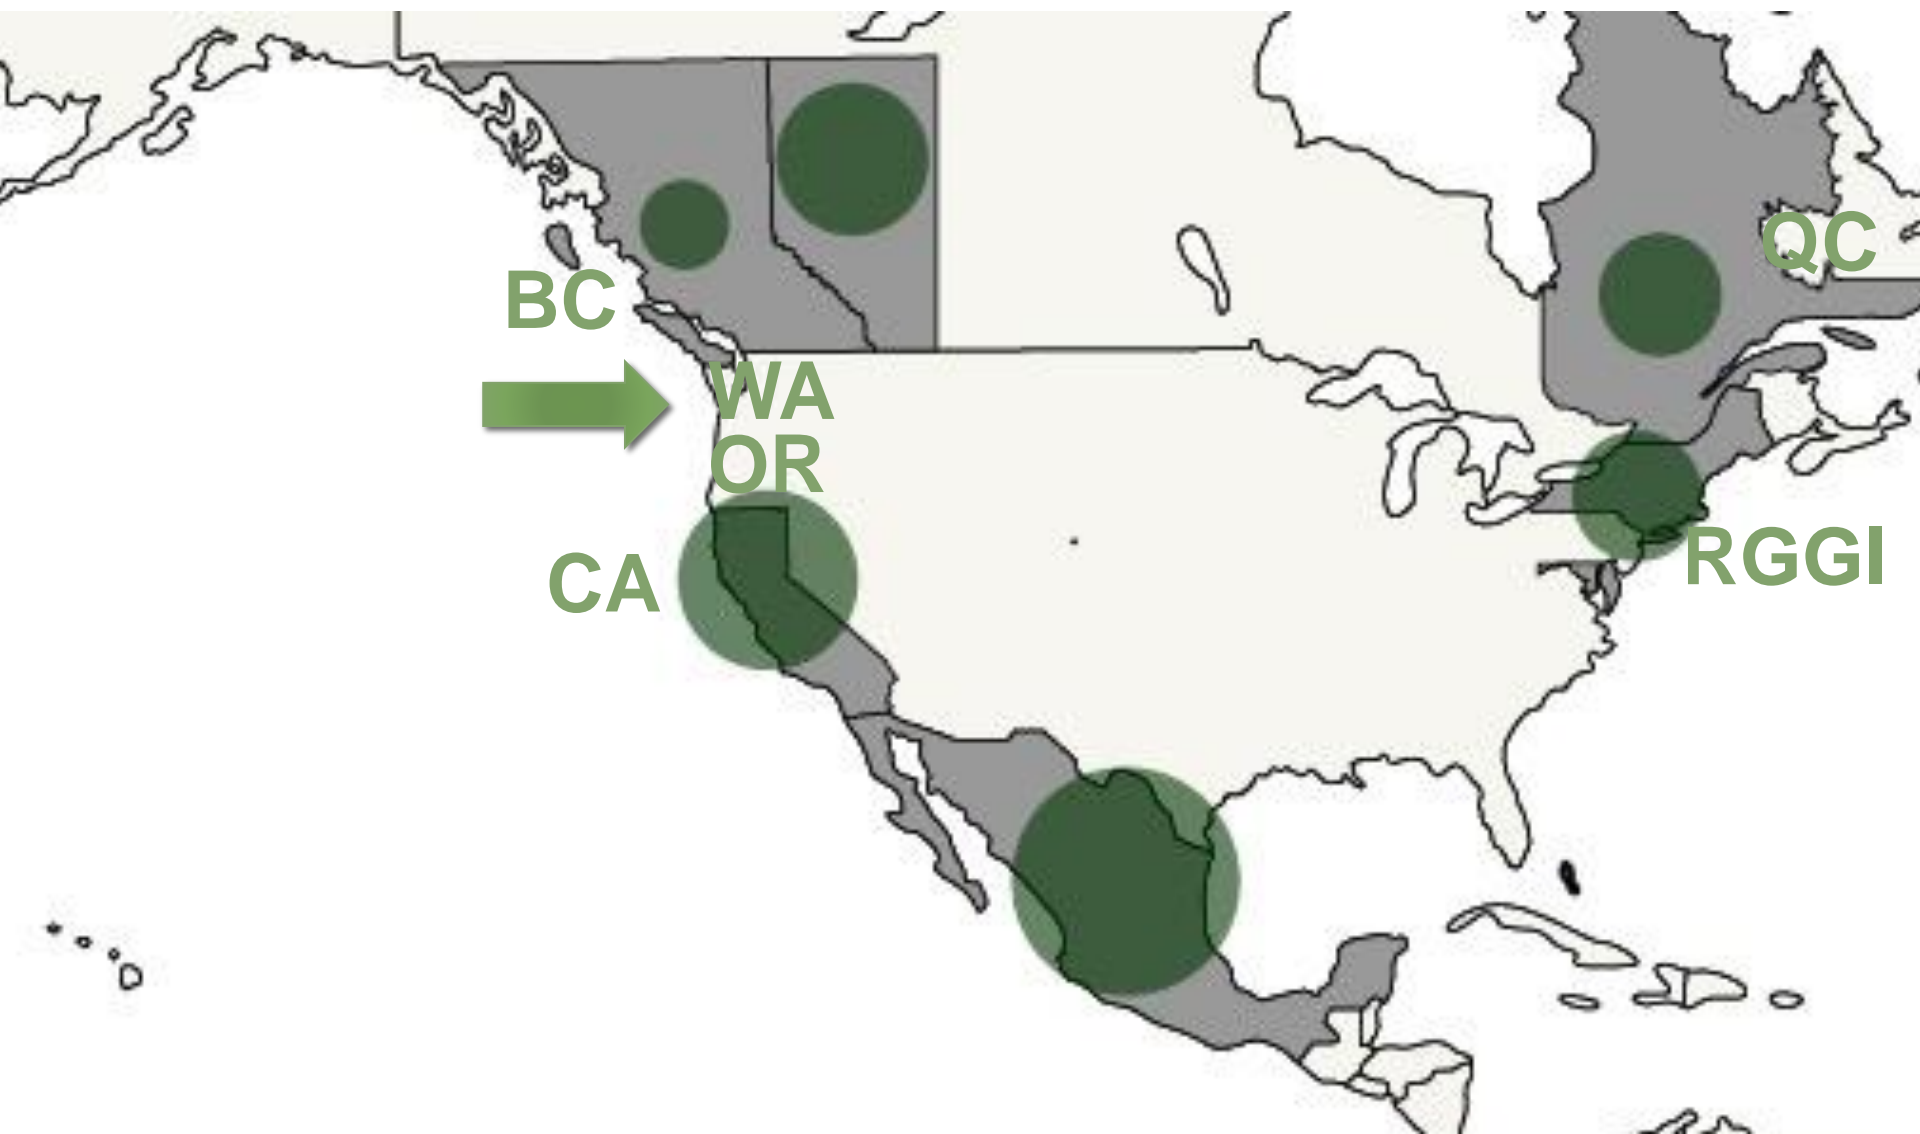

# Clean energy future – here we come!

# WANT TO KNOW MORE?
