

Student Activities

Winter 2011, submitted by Tom Mercado

1. What **additional** assessment efforts have been made within your department since the assessment plans were completed and shared? This is our primary area of interest (examples might include more data collection, or greater use of data already available, or Student Voice survey data, or additional action taken because of what the data told you, etc.).

Student Activities Administration, KAOS and the Children's Center are currently going through the biennial budget review process conducted by the Services and Activities Fee Allocation Board. As part of the review each area was required to submit a budget proposal packet that included a mission statement, organizational chart, summary and evaluation of 2009-2011 goals and objectives, 2011-2013 goals and objectives and budget request forms for both years of the biennium. In addition all S&A fee funded units were required to attend an S&A Board hearing to respond to questions presented by students on the Board. Tier One deliberations are scheduled for March 5, 2011. The students will present their budget recommendations for the 2011-2013 biennium to the Board of Trustees on June 9, 2011.

Student Activities continues to require all student coordinators and other student leaders to complete a Student Leadership Activity Report for every five weeks. The office continues to compile various usage statistics and collect event evaluations. Data collected from the 2009-2010 S&A Board survey is used by the staff regularly to advise individual student organizations and the S&A Board. The staff will once again work with this year's S&A Board in conducting their annual survey this spring.

KAOS recently submitted their annual survey results to the Corporation for Public Broadcasting.

Student Activities continues to work collaboratively with Intercity Transit on assessing student ridership.

2. What additional assessment effort(s) would you like to accomplish in the next year (this might be something new, or doing more with some data you currently have)?

Student Activities will be compiling data for the new CAB Information Desk. This information will be used to further develop the desk and to support future funding of the info desk.

3. What is the biggest barrier to additional assessment in your area?

Time and resources
